relations of power and difference between Chinese entrepreneurs and African migrant workers in these wholesale shops. These relations, Huang contends, replicate and perpetuate global structures of white supremacy, anti-Blackness, capitalism, and colonialism, even when whiteness is not present. Huang argues that this dynamic reflects the sedimented legacies and continued operation of white supremacy and colonialism, which have been transformed in the shift of capitalism's center of gravity toward China and the Global South. These new forms of racial capitalism and empire layer onto and extend histories of exploitation and racialization in South Africa. Taking a palimpsestic approach, Huang offers tools for understanding this shift and decentering contemporary Western conceptions of race, empire, and racial capitalism in the Chinese Century.

Transformation of the University Søren S.E. Bengtson, Ryan Evely Gildersleeve, 2022-04-25. *Transformation of the University* imagines preferable futures for the university, building hope for the institution's necessary transformation. It transcends old criticisms and presents fresh ideas on how the institution might be conceived, organized, and put into practice while safeguarding that which makes it a university: the pursuit of knowledge. This book is divided into three main parts. Part One, Knowledge, assumes the role of the university in generating knowledge for the benefit of society. Part Two, Cultural Growth, expands on how the university might contribute to and benefit from the cultural growth of society, with both explicit and implicit connections to social and epistemic justice. Part Three, Institutions, focuses on imaginative processes for enacting the university as an institution that meets the unforeseen future challenges facing societies around the world. With contributions from scholars across the world, *Transformation of the University* is an essential read for all academics, practitioners, institutional leaders, and broad social thinkers who are concerned with the future of the university and its contributions to society.

Language Policy and Planning in Universities Anthony J. Liddicoat, 2018-10-18. In a world where higher education is increasingly internationalized, questions of language use and multilingualism are central to the ways in which universities function in teaching, research, and administration. Contemporary universities find themselves in complex linguistic environments that may include national-level language policies, local linguistic diversity, an internationalized student body, increasing international collaboration in research, and increased demand for the use and learning of international languages, especially English. The book presents a critical analysis of how universities are responding to these complexities in different contexts around the world. The contributions show that language issues in universities are complex and often contested as universities try to negotiate the national and the international in their work. In some contexts, universities' language policies and the ways in which they are implemented may have a negative impact on their ways of working. In other contexts, however, universities have embraced multilingualism in ways that have opened up new academic possibilities for staff and students. Collectively, the chapters show that universities' language policy and planning are a work in progress and that much further work is needed for universities to achieve their language goals. This book was originally published as a special issue of *Current Issues in Language Planning*.
