Thomsett, 2001-07 This book includes self test section at the end of each chapter Test yourself then check answers in the back of the book to see how you score CD ROM included **Contractor's Guide to QuickBooks Pro 2001** Karen Mitchell, Craig Savage, Jim Erwin, 2001 **Estimating and Measurement for Simple Building Works in Hong Kong** Caroline T. W. Chan, 2020-12-30 This book is an introductory text on building measurement and estimating for simple buildings in Hong Kong based on the Hong Kong Standard Method of Measurement of Building Works 4th Edition Revised 2018 HKSM4 Rev 2018 It provides a toolkit for students and surveying technicians who are new to the subject This second edition updates the contents in line with the HKSM4 Rev 2018 and incorporates the latest industry developments such as BIM The main text is divided into five parts following the development of a typical project Part 1 Building the project team introduces the team setup for a typical project Part 2 Deciding the procurement strategy explains the various procurement decisions to be made by an employer before any cost estimating and measurement work takes place Part 3 Preparing for tender covers the tendering methods tender documentation and approximate estimating techniques used by Quantity Surveyors Part 4 Measuring quantities introduces measurement principles and HKSM4 Rev 2018 followed by a detailed review of the measurement methods for each major trade with worked examples Part 5 Estimating unit rates explores the basic techniques for unit rate preparation The book contains worked examples from real Hong Kong building projects self assessment questions reminders and points of note It is essential reading for Hong Kong construction and surveying students international Quantity Surveyors working in the local area and those wanting international examples of Quantity Surveyors practice Building Construction Estimating Stephen D. Schuette, Roger W. Liska, 1994 Building Construction Estimating furnishes readers with specific details on how a general building contractor derives the cost of a project before it begins and how the estimate fits into the total construction process The book provides coverage of such areas as determining labor productivity and wages selecting equipment and assigning productivity rates and costs acquiring specialty contractor prices and assigning overhead costs and profit The material is presented from the point of view of a general contractor working on a

competitively bid stipulated sum lump sum contract However other contract methods and the effects they have on the estimating process are also discussed Furthermore the principles of estimating for the specialty trades are discussed from the reference of a general building contractor and how the subcontractor's bid will affect the total project cost is presented Of special note is the book's introduction and utilization of computers in the estimating process enabling readers to utilize new technology in an effective and efficient manner The book is organized in a way that first teaches the reader to perform many of the estimating activities manually then guides them in developing a computer spreadsheet The use of spreadsheets empowers the reader to go beyond the manual calculations and develop new and more proficient solutions to estimating problems

Cost Accounting and Financial Management for Construction Project Managers Len Holm, 2018-09-03

Proper cost accounting and financial management are essential elements of any successful construction job and therefore make up essential skills for construction project managers and project engineers Many textbooks on the market focus on the theoretical principles of accounting and finance required for head office staff like the chief financial officer CFO of a construction firm This book's unique practical approach focuses on the activities of the construction management team including the project manager superintendent project engineer and jobsite cost engineers and cost accountants In short this book provides a seamless connection between cost accounting and construction project management from the construction management practitioner's perspective Following a complete accounting cycle from the original estimate through cost controls to financial close out the book makes use of one commercial construction project case study throughout It covers key topics like financial statements ratios cost control earned value equipment depreciation cash flow and pay requests But unlike other texts this book also covers additional financial responsibilities such as cost estimates change orders and project close out Also included are more advanced accounting and financial topics such as supply chain management activity based accounting lean construction techniques taxes and the developer's pro forma Each chapter contains review questions and applied exercises and the book is supplemented with an eResource with instructor manual estimates and schedules further cases and figures from the book This textbook is ideal for use in all cost accounting and financial management classes on both undergraduate and graduate level construction management or construction engineering programs
