Africa James Leigland,2020-05-07 Expectations are high regarding the potential benefits of public private partnerships PPPs
for infrastructure development in low income countries The development community led by the G20 the United Nations and
others expects these partnerships between governments and private companies in infrastructure service provision to aid
transformational mega projects as well as efforts to achieve the Sustainable Development Goals Yet PPPs have been widely
used only since the 1990s and discussion of their efficacy is still dominated by best practice guidance academic studies that
focus on developed countries or ideological criticism Meanwhile practitioners have quietly accumulated a large body of
empirical evidence on the actual performance of PPPs The purpose of this book is to summarize and consolidate what this
critical mass of evidence based research indicates about PPPs in low income countries and thereby develop a more realistic
perspective on the practical value of these mechanisms With a primary focus on Sub Saharan Africa though drawing on
critical insights from other regions it demonstrates that the benefits of such partnerships will only be realised if expectations
remain modest and projects are subject to transparent evaluation and competition **Publishers' Circular and**
