Southeast Paper Conference:

The Supply of Petroleum Reserves in South-East Asia Corazón Morales Siddayao, 2013-03-13 which may be termed political risks may be important determinants of investment After taking such risks into consideration in the exploration and development stage a firm computing the present value of its probable income stream must consider several other factors In addition to the current rate of production it must consider these 1 engineering limits to the rate of extraction in any given period 2 physical limits to the total amount of the resource that can be produced within a given location and 3 limits to the availability of new petroleum sources at the same costs as at the present location It might be useful at this point to note that the firm as an exploration agent in South East Asia operates largely as a contractor to the host government who has ownership and final control over the petroleum resources The group of suppliers of petroleum reserves in the region is characterized by the presence of the major companies directly or through subsidiaries as well as by many smaller and even independent companies Three major companies currently dominate exploration and producing operations in two countries Exxon and Shell in Malaysia Shell in Brunei In Indonesia Caltex and Stanvac dominate production Outside Malaysia and Brunei the bulk of new exploration is conducted by relatively smaller companies side by side with the major companies like Exxon Gulf Mobil Shell and Texaco *East Asia and Pacific Area [Special Papers Available]*. The United States and Southeast Asian Regionalism
Sue Thompson, 2018-11-08 The Nixon or Guam Doctrine of 1969 stressed the importance of progress towards regional cooperation and Asian collective security indicating that Asian countries themselves should take the initiative in creating programs in which the United States could participate This book analyses the development of United States regional cooperation policy on Southeast Asia and its importance to long term planning for the region that had been the general aim of successive American post war administrations The author demonstrates the link between economic regional cooperation

and collective security in Southeast Asia placing regionalism in an international context by examining the influence United States policy and various important events had on the development of Southeast Asian regionalism Through the analysis of primary material including previously classified material in the United States the United Kingdom and Australia and engagement with historiography of war and peace in Southeast Asia the book puts forward the argument that Southeast Asian regional cooperation was influenced by both American and Asian policy and its development reflected the economic and political transformation of the post war Southeast Asian landscape It also examines the developments in British and Australian policy and how developments in Southeast Asia influenced and in turn were affected by the policies of the Western powers Adding to the current discourse concerning the origins of Southeast Asian regionalism this book will be of interest to academics in the field of Southeast Asian studies United States political history international relations and regionalism
