Robert Deuchars

Stephen Gill Global Panopticon:

The Republican Legacy in International Thought Nicholas Greenwood Onuf, 1998-01-08 Republicanism has enjoyed a revival of scholarly interest in several fields In this book Nicholas Onuf provides the first major treatment of the republican way of thinking about law politics and society in the context of international thought The author tells two stories about republicanism starting with Aristotle and culminating in the eighteenth century when international thought became a distinctive enterprise These two stories surround the thought of Vattel and Kant and by telling them side by side the author identifies a substantial but little acknowledged legacy of republicanism in contemporary discussions of sovereignty intervention international society peace levels of analysis and the global economy In identifying this legacy in contemporary thought Nicholas Onuf develops his constructivist approach to international theory *The International Political Economy of Risk* Robert Deuchars, 2017-11-28 The discipline of international political economy faces a number of critical challenges at present as it seeks to incorporate a number of relatively new issues one of these being risk This captivating and enlightening study redresses the neglect of risk in this field by focusing on objectivist rationalism Highlighting some of the calculative practices rationalism makes possible it demonstrates the deeply political nature of supposedly value neutral technical pursuits such as accounting auditing the practice of statistics sampling and credit rating All these practices are implicated in modernist forms of power and governance The volume draws on work from various disciplines including sociology anthropology political economy and philosophy to explain the apparent unravelling of the rationalist quest for more reliable forms of knowledge It is highly suitable for courses on international relations international political economy

Transnationalism from Below Michael Peter Smith, 2017-09-29 Expansion of transnational capital and mass media to even the remotest of places has provoked a spate of discourse on transnationalism A core theme in this debate is the penetration of national cultures and political systems by global and local driving forces The nation state is seen as weakened by transnational capital global media and emergent supranational political institutions It also faces the decentering local resistances of the informal economy ethnic nationalism and grass roots activism *Transnationalism From Below* brings together a rich combination of theoretical and grounded studies of transnational processes and practices discussing both their positive and negative aspects The editors examine the scope and limits of transnationalism The volume is divided into four parts Theorizing Transnationalism Transnational Economic and Political Agency Constructing Transnational Localities and Transnational Practices and Cultural Reinscription Contributors include Andre C Drainville Josephine Smart Alan Smart Minna Nyberg Sørensen George Fouron Nina Glick Schiller Luin Goldring Sarah J Mahler Linda Miller Matthei Louisa Schein David A Smith and Robert C Smith Moving easily between micro and macro analyses this book expands the boundaries of the current scholarship on transnationalism locates new forms of transnational agency and poses provocative questions that challenge prevailing interpretations of globalization *Transnationalism From Below* is a pioneering collection that will make a

significant addition to the libraries of anthropologists sociologists international relations specialists urban planners political scientists and policymakers

US Economic Aid in Egypt Dina Jadallah, 2016-01-27 Economic aid is one of the cornerstones of the Egyptian American relationship and plays a significant role in promoting US policy objectives in the Middle East Focusing on the latter half of Hosni Mubarak's rule Dina Jadallah argues that through its aid policy the US has attempted to use a reforming and democratising narrative to transform Egypt into a stable market democracy that would be aligned with US interests in the region This aim has been pursued in conjunction with one that promoted a comprehensive warm peace with Israel By highlighting the opposition within Egypt to US aid Jadallah analyses the key issues that came to the fore during the 2010-11 protests in the country and led to the downfall of Mubarak Extending her analysis into the post revolutionary period the author provides interviews with regime insiders and prominent critics inside state institutions and outside who actively challenged the regime This enables her to assess the different perceptions of US aid both under Mubarak and in the current political situation contributing to an incisive analysis of modern Egypt and its relations with its superpower ally in the region

The Politics of the New International Financial Architecture Susanne Soederberg, 2004-11 Recent years have witnessed a veritable epidemic of financial crises from Mexico through South East Asia Russia Brazil and now Argentina The rich industrial countries led by the United States have had to respond This book examines the G7's attempts over the past decade to re-establish rules and a degree of order in the world financial system through the creation of the Financial Stability Forum and the G20 which they are calling the New International Financial Architecture Susanne Soederberg asks Why has the New International Financial Architecture emerged At whose initiative What does it involve What are the underlying power relations Who is benefiting Will it really work The author argues however that this tinkering with the capitalist system will not achieve either sustained economic growth or stability in financial markets let alone enhance the capability of developing countries to tackle the problems of mass poverty and social injustice

Crisis, Austerity, and Transformation Isabel David, 2018-01-22 Discussions of the recent austerity measures in Southern Europe as a response to the sovereign debt crisis have been usually framed in terms of their economic impact However the general impoverishment of these countries has induced other massive social and political changes a fact which is ignored in the literature This volume seeks to fill this gap and break ground by analyzing these trends in the Portuguese context Portugal has been portrayed as the Troika's good pupil by obediently adopting all prescribed austerity measures In the process the nation's fragile social fabric has been destroyed Massive emigration particularly by young people massive increases in poverty and a foundering economy have triggered a collective framing of the crisis and austerity as unjust and punitive of a collectivity that at the beginning naively believed in the neoliberal narrative of the benign effects of the cuts This reframing unleashed an unprecedented wave of social and political mobilization in an otherwise traditionally apathetic society This resistance needs to be addressed as a direct effect of austerity policies and properly analyzed for what it really

represents a process of repoliticization and re democratization sweeping Europe These mobilizations include direct democracy experiments the growing influence of social movements the massive March 2011 demonstrations were a direct inspiration for the creation of the Indignado movement in Spain attesting the contagion effect solidarity economy and the major political change in the country s 42 years of democratic rule an alliance of the left parties unthinkable before the crisis and which is reframing relations with the European Union This volume offers a first approach to the massive political social and cultural transformations taking place in the country that make Portugal in certain aspects a lab for innovative practices e g participatory budgets and the alliance of the left parties that may be used elsewhere as alternatives to current understandings of economic and political orthodoxy

Power and Resistance in the New World Order Stephen Gill, 2008-04-10 In this fully revised and updated new edition leading political scientist Stephen Gill further develops his radical theory of the new world order to argue that as the globalization of power intensifies so too do globalized forms of resistance Including two new chapters this widely adopted text offers alternatives to the current world order

Political Economy and the Changing Global Order Richard Stubbs, Geoffrey R. D. Underhill, 2006 Covering the basics necessary for a course in international political economy IPE this text comes from a non American critical perspective and the contributors are drawn from prominent scholars of IPE around the world

Gendered States of Punishment and Welfare Adrienne Roberts, 2016-09-13 This book presents a feminist historical materialist analysis of the ways in which the law policing and penal regimes have overlapped with social policies to coercively discipline the poor and marginalized sectors of the population throughout the history of capitalism Roberts argues that capitalism has always been underpinned by the use of state power to discursively construct and materially manage those sectors of the population who are most resistant to and marginalized by the instantiation and deepening of capitalism The book reveals that the law along with social welfare regimes have operated in ways that are highly gendered as gender along with race has been a key axis along which difference has been constructed and regulated It offers an important theoretical and empirical contribution that disrupts the tendency for mainstream and critical work within IPE to view capitalism primarily as an economic relation Roberts also provides a feminist critique of the failure of mainstream and critical scholars to analyse the gendered nature of capitalist social relations of production and social reproduction Exploring a range of issues related to the nature of the capitalist state the creation and protection of private property the governance of poverty the structural compulsions underpinning waged work and the place of women in paid and unpaid labour this book is of great use to students and scholars of IPE gender studies social work law sociology criminology global development studies political science and history

The Art of the Feud Jose V. Cipro, 2000-08-30 Poised between the end of the Cold War and the start of a new millennium international relations theory finds itself at a major intellectual crossroads Globalizing phenomena emerging non state actors revolutionizing technologies and a self redefining fluidity in power relations are just a few of the challenges that international

relations theorists must find ways to take into account It is increasingly apparent that traditional paradigms alone are not up to the task The time is right for a new set of explorations based ironically on one of the field s greatest traditions its willingness to apply an interdisciplinary approach to asking new questions and finding newer answers The outstanding contributors to this landmark volume offer a fundamental reexamination of the basic assumptions and theoretical tools of traditional international relations theory Ciprut draws on a wide range of concepts from the hidden dimensions of mindset and language to the societal implications of evolutionary ecology Unabashedly creative and iconoclastic in its willingness to search for new insights The Art of the Feud is a substantiated call to seek more inclusive dynamic and interactive forms of theory attuned to the new and evolving realities of the global scene **Digital Democracy** Cynthia Jacqueline

Alexander, Leslie Alexander Pal, 1998 The Information Age has ushered in significant change not only to the work people do and how they communicate with each other but also to the broad political landscape In Digital Democracy Policy and politics in the Wired World editors Cynthia J Alexander and Leslie A Pal present 12 important essays by Canadian and American scholars on the impact of cyberspace on politics and the implications this impact has for our future as private citizens

Periodical Literature , 1995 **Topographies of Globalization** Valur Ingimundarson, Kristín Loftsdóttir, Irma

Erlingsdóttir, 2004 The term globalization has been used to describe the intensification of cross border flows whether in the realm of ideas culture finance trade or human mobility Like many other vital ideas such as nationalism and modernization globalization is fraught with controversy But no matter where one stands it is a site of an ongoing intellectual endeavor of definition interpretation and redefinition a contested terrain that continues to have profound if unequal impact on people s lives around the world Given the inherent tension between the global and local this phenomenon is perhaps more accurately explained by the conceptual hybrid globalization The diverse contributions in this volume are an attempt to come to grips with some of the implications of this process by problematizing and engaging it It grew out of an interdisciplinary conference on globalization held at the University of Iceland in late autumn 2002 as part of an international research project coordinated by GERM Groupe d Etudes et de Recherches sur les Mondialisations involving a large group of academics universities and institutions The volume emphasizes specific aspects of the globalization debate politics culture gender and language translation One focus articulated among others by Zygmunt Bauman is on the reconfigurations of political power relationships between the West and the Rest the war on terror and conflict resolution whether in the name of peacekeeping nation building or identity changes Another theme involves the problematization of the culture concept its place in the public domain and the redefinition of identities as a result of globalization A third aspect deals with attempts to illuminate how globalization processes may deepen gender class and race inequalities in the absence of binding rules and collective social

responsibility Finally the focus is on the changing attitudes toward language translation in a heavily mediatized and accelerated world *Socialist Register 2005* Colin Leys, Leo Panitch, 2004 How does the new American empire work Who runs it How stable is it What is the new American Empire's impact throughout the world What is its influence on gender relations On the media On popular culture This book provides the answers *The Brown Journal of World Affairs*, 1997

Afrikaners in the New South Africa Rebecca Davies, 2009-02-28 How has the position of Afrikaners changed since the end of the Apartheid regime in South Africa While the links between Afrikaner nationalist identity and the apartheid regime have been irrevocably altered it is evident that this newly disempowered minority still commands a vast material and cultural capital Certain Afrikaans speakers have become important players in the new South Africa and on the world stage Davies argues that the global political economy and the closely associated ideology of globalization are major catalysts for change in Afrikaner identifications and positions She identifies multiple Afrikaner constituencies and identities and shows how they play out in the complex social economic and political landscape of South Africa Accessible informative and well written *Afrikaners in the New South Africa* is a vital contribution to our understanding of post apartheid South Africa It will be indispensable for those interested in South Africa identity politics globalization international political economy and geography
