Nigrini,2012-03-09 A powerful new tool for all forensic accountants or anyone whoanalyzes data that may have been altered Benford s Law gives the expected patterns of the digits in thenumbers in tabulated data such as town and city populations orMadoff s fictitious portfolio returns Those digits in unaltereddata will not occur in equal proportions there is a large biastowards the lower digits so much so that nearly one half of allnumbers are expected to start with the digits 1 or 2

These patterns were originally discovered by physicist Frank Benford in the early 1930s and have since been found to apply to all tabulated data. Mark J. Nigrini has been a pioneer in applying Benford's Law to auditing and forensic accounting even before his groundbreaking 1999 Journal of Accountancy article introducing this useful tool to the accounting world. In Benford's Law, Nigrini shows the widespread applicability of Benford's Law and its practical uses to detect fraud errors and other anomalies. Explores primary associated and advanced tests all described with data sets that include corporate payments data and election data. Includes ten fraud detection studies including vendor fraud, payroll fraud, due diligence when purchasing a business, and tax evasion. Covers financial statement fraud with data from Enron, AIG, and companies that were the target of hedge fund short sales. Looks at how to detect Ponzi schemes including data on Madoff, Waxenberg, and more. Examines many other applications from the Clinton tax returns and the charitable gifts of Lehman Brothers to tax evasion and number invention. Benford's Law has 250 figures and uses 50 interesting authentic and fraudulent real world data sets to explain both theory and practice and concludes with an agenda and directions for future research. The companion website adds additional information and resources. Transition in Survival Enese Lieb-Doczy, 2019-07-16. This title was first published in 2001. This work features different companies and their change in situation between 1990 and 1997. The author focused on changes in each company's vertical integration, its integration with and relationship to its investor, changes in its human resource policies, and the general handling of labour shedding, changes in its product range, production methods, product markets, and competitive situation, and the regional effects of FDI and changes in the company's procurement policies. The study comprises mainly of manufacturing companies with a few construction companies included to examine issues arising from localized company operations.

Lives of the Laureates, seventh edition Roger W. Spencer, David A. Macpherson, 2024-04-30. Autobiographical accounts by Nobel laureates reflect the richness and diversity of contemporary economic thought and offer insights into the creative process with six new laureates. Lives of the Laureates offers readers an informal history of modern economic thought as told through autobiographical essays by thirty-two Nobel Prize laureates in economics. The essays not only provide unique insights into major economic ideas of our time but also shed light on the processes of intellectual discovery and creativity. The accounts are accessible and engaging, achieving clarity without sacrificing inherently difficult content. This seventh edition adds six Nobelists to its pages. Roger B. Myerson, co-recipient in 2007, describes his evolution as a game theorist and his application of game theory to issues that ranged from electoral systems to perverse incentives. Thomas J. Sargent, co-recipient in 2011, recounts the development of the rational expectations model which fundamentally changed the policy implications for macroeconomic models. Amartya Sen, recipient in 1998, reflects on his use of a bicycle later donated to the Nobel Museum to collect data early in his career. A. Michael Spence, co-recipient in 2001, describes among other things his whiplash inducing first foray into teaching an undergraduate class. Christopher A. Sims, co-recipient in 2011, discusses his non-Nobel research, and Alvin E. Roth, co-recipient in 2012, chronicles

the three insurrections he has witnessed in mainstream economics

Lives of the Laureates grows out of a continuing lecture series at Trinity University in San Antonio which invites Nobelists from American universities to describe their evolution as economists in personal as well as technical terms
