Sophia von Berg,2020-12-17 Today firms all over the world have to deal with dynamic business environments Fast moving digitalization has made information more transparent strengthening the role of the customer At the same time the provider can have a much closer relationship with the user thanks to real time communication However corporate practice does not have a process for developing dynamic business models and user centric business models that can be designed and changed using smart technologies have not yet been systematically integrated To stay competitive companies need to rise to this challenge The aim of this dissertation was to develop a dynamic user centric process model for business model design and change and to evaluate the model s ability to maintain a competitive advantage in the mobility sector First the differences between static dynamic and user centric business models and their corresponding attributes were deduced Then these findings were combined into a process model using system dynamics logic This model considers the user a co creator of value and helps managers react to real time changes in their business model environment Finally a mobility sector case study is presented to highlight the relevance of this model to real world application This business model cycle BMC supports the strategic management of dynamic user centric business model design and change activities It describes a step by step procedure of business model design that includes ideation prototyping and integration of business model options Moreover it allows continuous monitoring of the business model environment and adaption of the model accordingly At the same time bidirectional interaction between the user and provider is possible allowing the provider to adapt to their users needs The BMC is unique in that these processes can take place simultaneously Finally the real world case study in the mobility sector confirmed that using the BMC for strategic management maintains a lasting competitive business advantage

Value-Focused Business Process Engineering : a Systems Approach Dina Neiger,Leonid Churilov,Andrew Flitman,2008-12-16 One of the keys to successful business process engineering is tight alignment of processes with organisational goals and values Historically however it has always been difficult to relate different levels of organizational processes to the strategic and operational objectives of a complex organization with many interrelated and interdependent processes and goals This lack of integration is especially well recognized within the Human Resource Management HRM discipline where there is a clearly defined need for greater alignment of HRM processes with the overall organizational objectives Value Focused Business Process Engineering is a monograph that combines and extends the best on offer in Information Systems and Operations Research Decision Sciences modelling paradigms to facilitate gains in both business efficiency and business effectiveness Business Strategies for Sustainability Helen Borland,Adam Lindgreen,Francois Maon,Véronique Ambrosini,Beatriz Palacios Florencio,Joelle Vanhamme,2018-10-03 Business Strategies for Sustainability brings together important research contributions that demonstrate different approaches to business strategies for sustainability Many corporate initiatives toward what firms perceive to be sustainability are simply efficiency drives or competitive moves falling far short of actual strategies for ecological sustainability To suggest true ecological sustainability

strategies this new research anthology adopts an interdisciplinary or transdisciplinary approach to discern what business strategies might look like if they were underpinned by environmental and ecological science The 23 chapters in this anthology reflect five main topic sections a delineating sustainability challenges and visions b contradiction integration and transformation of business and sustainability logics c innovating and developing strategic capabilities for sustainability d assessing and valuing sustainability and e toward multi level engagement and collaboration

The Philosopher's Stone for Sustainability Yoshiki Shimomura,Koji Kimita,2012-09-26 Industrial Product Service Systems IPS2 which is defined as an integrated industrial product and service offering that delivers value in use has expanded rapidly over the last decade IPS2 has allowed us to achieve both high added value and high productivity and has enriched our QOL by improving the performance of products and services We are now struggling with many awkward issues related to sustainability but IPS2 is expected to be the philosopher s stone for solving these issues Following the pattern of conferences held in Cranfield in 2009 Link ping in 2010 and Braunschweig in 2011 the fourth International CIRP Conference on Industrial Product Service Systems held on November 8 9 2012 in Tokyo will cover various aspects of IPS2 Topics planned for this year s conference reflect the latest IPS2 information in both the natural sciences and humanities and include case studies from various industries IPS2 is still a relatively new field so it is important to keep track of the entire context in order to promote more cross sectional cooperation between multimodal fields and disciplines The fourth International CIRP Conference on Industrial Product Service Systems will serve as a vital platform for such collaborations and the discussion of new scientific ideas
