updated edition continues to comprehensively approach all the different issues relating to intensive and acute cardiovascular care. The textbook is addressed to all those involved in intensive and acute cardiac care from cardiologists to emergency physicians and healthcare professionals. The chapters cover the various acute cardiovascular diseases that need high quality intensive treatment but also organisational issues, cooperation among professionals and interaction with other specialities in medicine. The largest section of the textbook is devoted to non cardiac disease which could acutely involve the cardiovascular system. Other noteworthy chapters are on ethical issues which are so important in acute cardiac care such as patient safety, donor organ management and palliative care. A unique characteristic of the textbook is the presence of a whole section devoted to biomarkers which underline the growing importance of laboratory medicine in the field of intensive and acute cardiac care. A particular asset of the textbook is the digital version available on Oxford Medicine Online which has additional online features including an extra chapter on lung ultrasound and many more images and videos as well as a full list of references from all chapters. The online version is updated by the same authors on a yearly basis and is available with the print version and separately on a subscription basis allowing easy access to content in digital and mobile optimised format. The textbook aligns directly with the core training curriculum for ACCA. This print edition of The ESC Textbook of Intensive and Acute Cardiovascular Care comes with access to the online version on Oxford Medicine Online for as long as the edition is published by Oxford University Press. By activating your unique access code you can read and annotate the full text online, follow links from the references to primary research materials and view, enlarge and download all the figures and tables.
