Abstract: The purpose of this study was to investigate the effect of a 12-week training program on the physical and psychological health of elderly people. The study was conducted in a community center in Tehran, Iran. The participants were 30 elderly people (15 men and 15 women) aged 65 and above. They were divided into two groups: a control group and an experimental group. The experimental group participated in a 12-week training program that included aerobic exercise, strength training, and flexibility exercises. The control group did not participate in any training program. The study found that the experimental group showed significant improvements in physical health (e.g., increased muscle strength, improved balance, and reduced risk of falls) and psychological health (e.g., reduced depression and increased social support) compared to the control group. The results suggest that a 12-week training program can effectively improve the physical and psychological health of elderly people.

The Marines, Counterinsurgency, and Strategic Culture Jeannie L. Johnson, 2018 The US Marine Corps has traditionally been one of the most innovative branches of the US military but even it has struggled to learn and retain lessons from past counterinsurgency wars Jeannie L Johnson looks at the clash between strategic culture and organizational learning through the US Marine Corps's long experience with counterinsurgency She first undertakes a fascinating examination of what makes the Marines distinct their identity norms values and perceptual lens To do this Johnson uses an innovative framework for analyzing strategic culture Next she traces the history of the Marines counterinsurgency experience from the expeditionary missions of the early twentieth century through the Vietnam War and finally to the Iraq War She shows that even a service as self aware and dedicated to innovation as the US Marine Corps is significantly constrained in the lessons learned process by its own internal predispositions Even when internal preferences can be changed ingrained biases endemic to the broader US military culture and American public culture create barriers to learning
