Gladstein, Dara Rossman Regaignon, 2012-03-19 WRITING PROGRAM ADMINISTRATION AT SMALL LIBERAL ARTS COLLEGES presents an empirical study of the writing programs at one hundred small private liberal arts colleges Jill M Gladstein and Dara Rossman Regaignon provide detailed information about a type of writing program not often highlighted in the scholarly record and offer a model for such national multi institutional research *The Utah Genealogical and Historical Magazine* , 1915 The WPA Guide to Utah Federal Writers' Project, 2013-10-31 During the 1930s in the United States the Works Progress Administration developed the Federal Writers Project to support writers and artists while making a national effort to document the country's shared history and culture The American Guide series consists of individual guides to each of the states Little known authors many of whom would later become celebrated literary figures were commissioned to write these important books John Steinbeck Saul Bellow Zora Neale Hurston and Ralph Ellison are among the more than 6 000 writers editors historians and researchers who documented this celebration of local histories Photographs drawings driving tours detailed descriptions of towns and rich cultural details exhibit each state's unique flavor Utah a state which is well known for its distinct religious history is thoroughly examined in this WPA Guide with an entire chapter on the relationship between the Church of Jesus Christ of Latter day Saints and the state of Utah The Beehive State also known for its natural beauty and plentiful resources also contains several pictures of the Great Salt Lake and mountainous desert landscape as well as an interesting essay on mining *The Writing Center as Cultural and Interdisciplinary Contact Zone* Randall W. Monty, 2016-05-05 Writing centers are complex They are places of scholarly work spaces of interdisciplinary interaction and programs of service among other things With this complexity in mind this book

theorizes writing center studies as a function of its own rhetorical and discursive practices In other words the things we do and make define who we are and what we value Through a comprehensive methodological framework grounded in critical discourse analysis this book takes a closer look at prominent writing center discourses by temporarily shifting attention away from the stakeholders work locations and scholarship of the discipline and onto things the artifacts and networks that make up the discipline Through this approach we can see the ways the discipline reinforces challenges reproduces and subverts structures of institutional power As a result writing center studies can be seen a vast ecosystem of interconnectivity and intertextuality

Literacy Practices and Perceptions of Agency Bronwyn T. and each is a highly contested focal point of significant debates about matters of power identity and values Each essay begins with the assumption that its central term is important precisely because its meaning is open and multiplex Keywords in Writing Studies reveals how the key concepts in the field are used and even challenged rather than advocating particular usages and the particular vision of the field that they imply The volume will be of great interest to both graduate students and established scholars

The Oxford Guide for Writing Tutors Melissa Ianetta, Lauren Fitzgerald, 2016 The Oxford Guide for Writing Tutors introduces two conversations to the tutor s preparation one about the creation of knowledge in writing programs the other about tutor research This approach to tutor training provides several benefits First it allows

tutors to test their theories of what might work in a writing center session and helps them to move professional conversation towards why such things happen They bridge the theory practice divide that often frustrates both novices and experienced tutors By conducting research to answer such questions tutors can help themselves the writers with whom they work their fellow tutors and the writers with whom they work And further this approach gives the reader new methods for appreciating and critiquing scholarly work making it easier to understand the best ways to help writers and to move the field forward As writing tutoring programs take on a variety of forms and pursue a range of missions this book aims to create a flexible text whose contents can be easily rearranged to support a broad spectrum of reader needs Each chapter accordingly can be read independently the text does not rely on a sequential reading to create meaning The book also includes intra textual and extra textual references for the reader who wants to inquire further That is throughout the book are references to material in other chapters that might be of interest to the reader intrigued by the topic at hand So too in each chapter we include references to and citations of the scholarship that supports much of the common knowledge of the field including in the Handbook both previous tutor education textbooks and research from the field The aim is to aid the interested reader's inquiry into the scholarship of the field as well as to ground advice about practice in research that testifies to the effectiveness a range of tutoring practices Much of the scholarship cited throughout the book is authored by undergraduate tutor researchers as well as several former tutors who were graduate students when they published their articles This crucial aspect best models the ways in which tutors themselves can bring together practice and research in their day to day work and in their informed thinking about this work Including tutor voices is an important tradition of the tutor education textbook because these are voices that speak to the issues concerning tutors in a range of institutions and programs across the country

Exploring Composition Studies Kelly Ritter, Paul Kei Matsuda, 2010-05-20 Kelly Ritter and Paul Kei Matsuda have created an essential introduction to the field of composition studies for graduate students and instructors new to the study of writing The book offers a careful exploration of this diverse field focusing specifically on scholarship of writing and composing Within this territory the authors draw the boundaries broadly to include allied sites of research such as professional and technical writing writing across the curriculum programs writing centers and writing program administration Importantly they represent composition as a dynamic eclectic field influenced by factors both within the academy and without The editors and their sixteen seasoned contributors have created a comprehensive and thoughtful exploration of composition studies as it stands in the early twenty first century Given the rapid growth of this field and the evolution of its research and pedagogical agendas over even the last ten years this multi vocal introduction is long overdue

Assessment in Technical and Professional Communication Margaret Hundley, Jo Allen, 2017-07-05 This collection of essays focuses on both how and why assessment serves as a key element in the teaching and practice of technical and professional communication The collection is organized to form a dual approach on the one hand it offers a landscape view of the activities involved in

assessment examining how it works at institutional program and classroom levels on the other it surveys the implications of using assessment for formulating maintaining and extending the teaching and practice of technical communication The book offers teachers students scholars and practitioners alike evidence of the increasingly valuable role of assessment in the field as it supports and enriches our thinking and practice No other volume has addressed the demands of and the expectations for assessment in technical communication Consequently the book has two key goals The first is to be as inclusive as is feasible for its size demonstrating the global operation of assessment in the field For this reason descriptions of assessment practice lead to examinations of some key feature of the landscape captured by the term technical communication The second goal is to retain the public and cooperative approach that has characterized technical communication from the beginning To achieve this the book represents a conversation with contributors chosen from among practicing highly active technical communication teachers and scholars and the chapters set up pairs of opening statement and following response The overriding purpose of the volume therefore is to invite the whole community into the conversation about assessment in technical communication

Unsettling the Literary West Nathaniel Lewis, 2003-01-01 The test of western literature has invariably been Is it real Is it accurate Authentic The result is a standard anything but literary as Nathaniel Lewis observes in this ambitious work a wholesale rethinking of the critical terms and contexts and thus of the very nature of western writing Why is western writing virtually missing from the American literary canon but a frequent success in the marketplace The skewed status of western literature Lewis contends can be directly attributed to the strategies of the region's writers and these strategies depend consistently on the claim of authenticity A perusal of western American authorship reveals how these writers effectively present themselves as accurate and reliable recorders of real places histories and cultures but not as stylists or inventors The imaginative qualities of this literature are thus obscured in the name of authentic reproduction Through a study of a set of western authors and their relationships to literary and cultural history Lewis offers a reconsideration of the deceptive and often undervalued history of western American literature With unequivocal admiration for the literature under scrutiny Lewis exposes the potential for startling new readings once western writing is freed from its insistence on a questionable authenticity His book sets out a broader system of inquiry that points writers and critics of western literature in the direction of a new and truly sustaining literary tradition
