Computational Methods in Engineering & Science Zhenhan Yao, Mingwu Yuan, 2007-12-31 The 9th EPMESC was successfully held in Macao in November of 2003 At the end of the conference the Board of the EPMESC series decided that the next conference would be held in a city of the mainland of China Also I was assigned to be the Chair person of the Conference No doubt this is a great honor to me and also a challenge because there are so many professional international conferences in computational mechanics happening frequently in the world After the successful organizing of WCCM6 in Beijing September of 2004 I engaged to organize the 10th EPMESC First of all I had to choose the venue of the Conference After some investigation and a lot of negotiation we went to see the site of the venue in Sanya Hainan Island the south most city in China Finally we made the decision The most important reason for the choice was the ecological environment of this city It is beneficial to our health after hard work We scientists and engineers need a good relaxing place after working hard a place to enjoy life with friends and family Sanya is an ideal place and a real green city Blue sky and white clouds the peaceful sea and the long beach with white sand shells and pearls no pollution and no industry Everything is so beautiful

Page v. Includes bibliographical references and index. Structural Failure and Plasticity X.L. Zhao, R.H. Grzebieta, 2000-10-04. As mankind continues to push back the boundaries and begins to explore other worlds and the ocean depths, a thorough understanding of how structures behave when subjected to extremes in temperature, pressure, and high loading rates will be essential. This symposium provided the perfect forum for presenting research into structures subjected to such extreme loads. There were a large number of papers presented under topics of impact, blast, and shock loading, indicating a strong research interest in high rates of loading. Similarly, new topics have been added to the traditional symposium list, such as fire loading, earthquake loading, and fatigue and connection failures. It is clear now that fundamental knowledge of plastic deformation of structures to various extreme loads is coming of age. Each full paper was peer reviewed by at least two experts in the field. Engineering Your Future David Dowling, Roger Hadgraft, Anna Carew, Tim McCarthy, Doug Hargreaves, Caroline Baillie, Sally Male, 2024-12-31. Offshore Geotechnical Engineering Mark Randolph, 2017-07-12 Design practice in offshore geotechnical engineering has grown out of onshore practice but the two application areas have tended to diverge over the last thirty years driven partly by the scale of the foundation and anchoring elements used offshore and partly by fundamental differences in construction and installation techniques As a consequence offshore geotechnical engineering has grown as a speciality The structure of Offshore Geotechnical Engineering follows a pattern that mimics the flow of a typical offshore project In the early chapters it provides a brief overview of the marine environment offshore site investigation techniques and interpretation of soil behaviour It proceeds to cover geotechnical design of piled foundations shallow foundations and anchoring systems Three topics are then covered which require a more multi disciplinary approach the design of mobile drilling rigs pipelines and geohazards This book serves as a framework for undergraduate and postgraduate courses and will appeal to professional engineers specialising in the offshore industry
