Pillay, Zannie Bock, Russell H. Kaschula, 2025-02-28 *Unlocking the chains of knowledge Understanding the challenges remaking pedagogies and curriculum renewal* addresses the complex yet imperative task of reshaping the colonial legacy embedded within South African higher education and beyond. The book confronts the historical and ideological bindings that have entrenched European centric knowledge within the fabric of academia in Africa propelling a transformative journey within the Arts and Humanities. At its core this work presents a tripartite focus firstly understanding the deep seated issues ingrained in the traditional university structure secondly remaking pedagogical practices and lastly renewing the curriculum. Recognising the historical dominance of Eurocentric ideas the book explores various movements theories and practices from negritude to postcolonial theory aiming to emancipate and amplify the voices and knowledge of those historically excluded. With a commitment to a pluralistic approach the book scrutinises the power dynamics of language the importance of diverse perspectives and the challenging task of inclusion without replicating the divisive structures of the past. Prof Christine Winberg Research Chair in Work integrated Learning Cape Peninsula University of Technology. In *Unlocking the chains of knowledge Understanding the challenges remaking pedagogies and curriculum renewal* the editors provide a decisive and detailed reflection and profound understanding of complexities of knowledge generation in Southern Africa. Unlike many volumes that address these intricate complexities this volume not only navigates the intricate complexities of the long history of epistemic injustices and intolerance in the Southern African higher education environment but delves deeper into the core of what is required for curriculum transformation and renewal. The groundbreaking volume addresses the urgent need for linguistic inclusivity consciousness about decoloniality as well as embedding social justice in South African and Zimbabwean education and by doing so presents strategies that can be used by the rest of the African continent in addressing the scourge of coloniality. Now however the rise in unemployment and lack of employment security the dizzying inequality gulf and the environmental disasters and mass migrations caused by this deregulation are generating an impetus that defines social justice no longer

merely in terms of the equitable distribution of resources but also and often primarily in terms of the just recognition of persons This collection of incisive essays recognizes that the growing interdependence of all of the people of the earth demands that labour rights are understood as an aspect of human rights and thus envisaged at the international level Contributions by twenty outstanding labour law scholars from a range of countries worldwide provide in depth analysis of such aspects of the debate as the following collective action in the interests of market effectiveness as well as fair outcomes for workers right to strike resilience of trade unions and collective bargaining as mechanisms of labour market regulation importance of national policy despite the influence of global market forces in shaping national outcomes work as the locus of the relationship between humans and nature search for a legal foundation for corporate social responsibility litigation as an alternative to collective bargaining the role of collective labour relations for immigrants and disabled people lessons that developed countries could learn from mechanisms pioneered in developing countries in coping with conditions of austerity and the trap of soft law and of declarations of intent that weigh lightly in the face of the power of the interests at play in international trade The essays take stock of the dimensions of the current situation and also explore paths leading to a better achievement of social justice in labour law These essays recognize that economic development and the pursuit of social justice are interwoven in a quest for social progress that includes mechanisms designed to eliminate unjustifiable inequality For lawyers and other parties committed to the emerging political will to not only respect fundamental rights but more broadly improve labour and environmental protection this book opens abundant avenues that can be pursued in practice and in policy The volume is based on a selection of papers presented at the 21st World Congress of the International Society for Labour and Social Security Law in Cape Town in 2015 From Hope to Action through Knowledge Ramesh
