Es por tanto una herramienta necesaria tanto para los técnicos que planifican y dirigen las operaciones forestales como para los operarios que desarrollan esas tareas. Igualmente se convierte en un texto muy indicado para apoyar y complementar la formación de los estudiantes universitarios de disciplinas forestales y medioambientales y también para los de estudios profesionales relacionados con el sector forestal, muy especialmente los correspondientes al Certificado de Profesionalidad AGAR 0108 Aprovechamientos Forestales. También complementa y amplía los libros de esta misma editorial bajo el sello Paraninfo perteneciente al mismo Grupo Editorial sobre mecanización y aprovechamientos correspondientes a las Unidades Formativas UF 0267 UF 0269 UF 0270 UF 0273 UF 0274. El libro proporciona información detallada sobre la maquinaria portátil y automotriz empleada en el monte, describe sus características y técnicas de uso, propone normas de organización de los trabajos que se realizan con ellas y analiza las consecuencias de esos trabajos sobre el entorno. También se recogen y explicitan las principales normativas que los regulan, haciendo especial hincapié en los aspectos medioambientales y de seguridad y salud. Se incluyen recomendaciones de mantenimiento y utilización de motosierras, desbrozadoras, tractores forestales, autocargadores, cosechadoras y procesadoras; se analizan en detalle sus componentes y su mecánica y se desglosa su empleo en aprovechamientos madereros para trabajar correctamente. Todos los contenidos se enfocan y desarrollan de forma eminentemente práctica buscando que sean de fácil aplicación y se acompañan de fotografías, dibujos, ilustraciones y gráficos que complementan con claridad lo expuesto en el texto.

Biomass for Energy, Environment, Agriculture and Industry P. Chartier, A.A.C.-M. Beenackers, G. Grassi, 2013-05-30 Interest in the use of biomass for non food applications has grown strongly in recent years mainly as a consequence of its potential as a prime renewable energy resource. Renewable energies rank highly among the options that will contribute to the prevention of climate change and to security of energy supply in the future. Furthermore, exploiting biomass is very attractive as a way of dealing with two sensitive issues facing the majority of western European countries today: the extent of unemployment and the setting aside of farm lands to limit excess agricultural production. The 8th European Conference for Energy, Environment, Agriculture and Industry held in Vienna October 1994 was larger than any of its predecessors with over 300 refereed contributions from 20 countries worldwide and over 520 participants. It was arguably the most significant event to date in this field providing the opportunity for an

international exchange of information on the recent progress in developing and implementing renewable biomass based non food technologies Published in 3 volumes the proceedings of this conference therefore contain the most complete overview of the present state of the art Subjects covered include biomass resource base electricity and heat generation transportation fuels chemicals from biomass products from bio and thermochemical conversion technologies economics environmental aspects and opportunities for implementation worldwide in particular in developing countries Apart from the numerous contributions on the most recent results in research development and implementation the publication also contains authoritative reviews on most of the above mentioned areas from leading experts in each field In addition to this it contains a list of key issues for developing a successful strategy leading to a rapid implementation in Europe and abroad As a result it is indispensable for anyone working in this area whether in research demonstration or in policy development
