100 power solutions to real-world problems. This practical guide gives you 100 ready-to-run PHP functions for solving most of the main problems you encounter when building a dynamic website with PHP. Every plug-in in the book offers a complete and working solution for a result you can achieve right away using ready-made code you simply drop into your own program. And there's little or no learning curve because each one is self-contained and thoroughly documented.
