Block, 2013 **The Well-Read Game** Tracy Fullerton, Matthew Farber, 2025-03-25 How players evoke personal and subjective meanings through a new theory of player response In The Well Read Game Tracy Fullerton and Matthew Farber explore the experiences we have when we play games not the outcomes of play or the aesthetics of formal game structures but the ephemeral and emotional experiences of being in play These are the private stories we tell ourselves as we play the questions we ask and our reactions to the game's intent These experiences are called readings because they involve so many of the aspects of engaging with literary cinematic and other expressive texts A game that is experienced in such a way can be called well read rather than or as well as well played because of the personal interpretive nature of that experience and the way in which it relates to our reading of texts of all kinds The concept of the well read game exists at the convergence of literary media and play theories specifically the works of Louise Rosenblatt's reader response theory Brian Upton's situational game theory Tracy Fullerton's playcentric design theory and Bernie DeKoven's well played game philosophy Each of these theories from their own perspective challenges notions of a separate objective or authorial meaning in a text and underscores the richness

that arises from the varied responses of readers who coauthor the meaning of each text through their active engagement with it. When taken together, these theories point to a richer understanding of what a game is and how we might better value our experiences with games to become more thoughtful readers of their essential meanings. **Getting the Message**

Across Stéphane Faroult, 2016-11-21. Create memorable presentations on technical and complex topics in slideware such as Microsoft PowerPoint and Apple's Keynote for Mac. Learn good pacing and rhythm as well as judicious use of special effects. Whether the goal is to help a sale or to educate and whether the final delivery is a live presentation, a webinar, or a short video presentation, this book focuses on the particular difficulties linked to technical presentations. You will learn to create a story when there is none, gain the interest of an audience who may not feel as strongly for the topic as the speaker does, turn abstract concepts into visual models, overcome the limitations of the medium (limited space, two dimensions), maintain interest through rhythm, and use effects not to look cool or get that WOW moment but to serve the message. **Getting The Message Across** presents a number of field-tested ideas for raising interest. The use of various techniques and careful scripting will help you even if you aren't a natural born show person to communicate effectively and to make your audience remember your message and not necessarily your slides. This book will teach you Rhythm and animations and the use of transitions. To hold audience interest even with dry topics. To create memorable presentations. Techniques useful for PowerPoint, Keynote for Mac, and any similar presentation medium or environment. What You Will Learn: Turn austere topics into interesting stories. Give rhythm and pacing to your presentations. Build a narrative during transitions and animations. Hold audience interest and make listeners feel clever. Make people remember your presentation rather than your cool use of slideware. Who This Book Is For: People who have to communicate effectively on strongly technical topics. This book targets educators and trainers as well as technical consultants who need to present complex solutions to customers or leads as well as would-be speakers at scientific or technical conferences. **Getting The Message Across** is a book for people who want to make their presentations not only more attractive but really memorable. It is for people who aren't looking for a standing ovation but who are willing to do what they can to be understood and to make their messages remembered. **Getting The Message Across** focuses on using slideware such as PowerPoint and Keynote. Such slideware, for all its flaws, is still one of the best ways to communicate not only live but also in dematerialized communications: webinars, video tutorials for reaching an ever-growing audience.
