no computer has been created that could not be hacked a sobering fact given our radical dependence on these machines for everything from our nation's power grid to air traffic control to financial services Yet as ubiquitous as technology seems today just over the horizon is a tidal wave of scientific progress that will leave our heads spinning If today's Internet is the size of a golf ball tomorrow's will be the size of the sun Welcome to the Internet of Things a living breathing global information grid where every physical object will be online But with greater connections come greater risks Implantable medical devices such as pacemakers can be hacked to deliver a lethal jolt of electricity and a car's brakes can be disabled at high speed from miles away Meanwhile 3 D printers can produce AK 47s bioterrorists can download the recipe for Spanish flu and cartels are using fleets of drones to ferry drugs across borders With explosive insights based upon a career in law enforcement and counterterrorism Marc Goodman takes readers on a vivid journey through the darkest recesses of the Internet Reading like science fiction but based in science fact Future Crimes explores how bad actors are primed to hijack the technologies of tomorrow including robotics synthetic biology nanotechnology virtual reality and artificial intelligence These fields hold the power to create a world of unprecedented abundance and prosperity But the technological bedrock upon which we are building our common future is deeply unstable and like a house of cards can come crashing down at any moment Future Crimes provides a mind blowing glimpse into the dark side of technological innovation and the unintended consequences of our connected world Goodman offers a way out with clear steps we must take to survive the progress unfolding before us Provocative thrilling and ultimately empowering Future Crimes will serve as an urgent call to action that shows how we can take back control over our own devices and harness technology's tremendous power for the betterment of humanity before it's too late
