student teachers and NQTs It is a clear comprehensive and practical guidebook dealing not solely with theory and pedagogy but with the very real issues facing new teachers today It is clear that Teaching Secondary English unlike so many textbooks on the subject is written by someone with recent classroom experience and this helps the reader to trust and respect the advice it purports I certainly feel it is grounded in practicalities not pie in the sky theory that will not work in most real classrooms This book enables English teachers to implement change and rise to new challenges while remaining true to an ethically and socially just position which provides the rationale for their vocation The author describes and evaluates recent changes to English teaching brought about by initiatives such as the Literacy Strategy the new A levels and the requirement to focus on spiritual moral social and cultural development Examples of innovative teaching and learning strategies are provided throughout The author helps teachers to foster keen readers writers and communicators He shows how they can enable their students to acquire skills and knowledge as well as to recognize the value of aesthetic experience emotional literacy and spiritual and moral response to literature in their own lives and in their communities This book is essential reading for PGCE students as well as practising teachers and all those involved in English in education

Rationing Education Gillborn, David, Youdell, Deborah, 1999-12-01 This research should make us extremely sceptical that the constant search for higher standards and for ever increasing achievement scores can do much more than put in place seemingly neutral devices for restratification Michael W Apple John Bascom Professor of Curriculum and Instruction and Educational Policy Studies University of Wisconsin Madison Recent educational reforms have raised standards of achievement but have also resulted in growing inequalities based on race and social class School by school league tables play a central role in the reforms These have created an A to C economy where schools and teachers are judged on the proportion of students attaining five or more grades at levels A to C To satisfy these demands schools are embracing new and ever more selective attempts to identify

ability Their assumptions and practices embody a new IQism a simple narrow and regressive ideology of intelligence that labels working class and minority students as likely failures and justifies rationing provision to support those often white middle class boys already marked for success This book reports detailed research in two secondary schools showing the real costs of reform in terms of the pressures on teachers and the rationing of educational opportunity It will be important reading for any teacher researcher or policymaker with an interest in equality in education
