Working Together to Reduce Harmful Drinking Marcus Grant, Mark Leverton, 2009-10-05 This book is intended to contribute to the World Health Organization's WHO global strategy to reduce the harmful use of alcohol It explores areas where alcohol producers technical competence can and does make a positive contribution to reducing harmful drinking and where industry input has been welcomed by WHO The book describes each of these areas producing beer wine and spirits addressing availability of noncommercial beverages pricing marketing and selling beverage alcohol encouraging responsible choices and working with others The final chapter sets out views of how alcohol producers can contribute to reducing harmful drinking in countries where they are present The messages recurring throughout the book

are that reasonable regulation provides the context for good alcohol policy excessive regulation often leads to unintended negative consequences leading producers have a proud record of making positive contributions to implementing effective alcohol policies but there are opportunities to do much more

Alcohol Advertising and Young People's Drinking B. Gunter, A. Hansen, M. Touri, 2010-10-13 There is widespread and growing concern about the use of alcohol in society especially by young people Although overall volumes of alcohol consumption may be levelling off the occurrences of excessive or binge drinking especially among teenagers and young adults are increasingly commonplace Tackling irresponsible drinking which is linked to other antisocial behaviour and health problems has focused attention on the promotion of alcohol by its producers as an important causal factor This has led to calls for tougher regulation of alcohol marketing including restrictions on where it can occur and the form it is allowed to take Empirical research evidence often emanating from government funded enquiries and endorsed by health lobbies has been cited in support of an allegedly primary role played by advertising in triggering interest in and the onset of alcohol consumption among young people and in encouraging regular and heavy drinking Close examination of this evidence however reveals that the research is not always as cut and dried as it may first appear Methodological weaknesses abound in studies of the purported effects of alcohol advertising and other forms of marketing and the significance specifically of advertising as an agent that shapes young people's alcohol consumption could be weaker than often thought This book sets out a review and critique of the evidence on alcohol advertising and marketing effects on young people and considers this evidence in relation to codes of advertising and marketing practice

Drug Science and British Drug Policy Ilana Crome, David Nutt, Alex Stevens, 2022-11-09 For half a century the Misuse of Drugs Act 1971 has dominated ill conceived approaches to the prohibition of drugs and the criminalisation of many offenders Wilful blindness to scientific facts has distorted the dispensation of justice prevented lifesaving investigation sidelined critics and thwarted advocates of politically

inconvenient drugs law reform This once in an epoch review by experts from a range of disciplines Drug Science and British Drug Policy shows how lawmakers and the media have ignored the scientific evidence to sustain badly founded rhetoric in favour of blanket bans punishment and the marginalisation of opponents Countless individuals including the vulnerable deprived addicted and mentally ill have therefore suffered unnecessarily This the most comprehensive critique of the 1971 Act yet rests on the combined learning of leading medical scientific psychiatric academic legal drug safety and other specialists to provide sound reasons to re think half a century of bad law A thorough examination of the 1971 Act which challenges long outmoded ideas Demonstrating political and media distortions the book calls for fresh thinking and urgent reform Drug Science and British Drug Policy is first rate in depth and highly informed Review It is time to see the MDA 1971 for what it is a bad law that has the opposite effect to that intended The so called war on drugs is lost It could never be won Let us replace this knee jerk law with something rational something evidence based something more humane Rt Hon Norman Baker From the Foreword

Advances in Foundational Mass Communication Theories Ran Wei, 2018-02-02 Providing leading edge perspectives on the legacy theories of mass media and society this collection advances the foundational theories of mass communications which have sustained the field of study over the past fifty years Many of these contributions were originally published as a Deutschmann Scholarly Essay in the Mass Communication and Society journal and together they comprise a remarkable source of knowledge equipped to lead mass communications theory through the emergence of new technologies and the evolution of communications in the 21st century Moreover the contributions gathered in this volume contradict any critics who may claim the theories of the 20th century have outlived their usefulness for these prove to guide contemporary research as forcefully as ever in the digital era Validating the classic media theories across time and their various forms constitute the second focal section of this volume Finally senior media scholars offer their views on the future directions in which mass communication theories can be advanced

Special Report to the U.S. Congress on Alcohol and Health from the Secretary of Health and Human Services ,1987 Binge Drinking in the Adolescent and Young Brain Eduardo

López-Caneda,Fernando Cadaveira,Salvatore Campanella,2019-03-20 Binge drinking BD is a highly prevalent pattern in most Western countries characterized by the intake of large amounts of alcohol in a short time followed by periods of abstinence This abusive form of alcohol consumption is a regular practice in around a third of European and American youths The high prevalence of BD at this age is of particular concern since adolescence and youth are in a period of special vulnerability to neurotoxic effects of alcohol mainly due to the structural and functional changes going on in the brain throughout this key developmental stage Evidence gathered during the last decade from animal and human studies seems to point to multiple brain anomalies associated with BD In this Research Topic we have collated a compendium of articles that address multiple aspects of BD during adolescence and young adulthood such as identification prevalence gender differences and neurocognitive anomalies associated with this excessive alcohol consumption pattern These articles collectively highlight the breadth of current research conducted in this field but also the need to join efforts to improve the screening of the BD pattern the characterization of its consequences as well as the translation of knowledge acquired in the laboratory into clinical practice We remain confident that this Research Topic will contribute significantly to the understanding of BD and its consequences and will further stimulate high quality investigation in this relatively new research field
