Distribution of Baryons at $z=0$ The meeting was held August 8-10 at the National Center for Atmospheric Research NCAR
located in Boulder Colorado on the foothills of the Rocky Mountains see conference photo We organized this meeting because
we felt it was time to address the link between galaxies and the intergalactic medium at low redshift In this vein we posed
several questions to the conference participants Where are the baryons in the local universe and in what phase do they
reside What signatures of galaxy evolution have been imprinted on the IGM What percentage of intergalactic gas is left from
the galaxy formation process What does the distribution of baryons at $z=0$ tell us about the early universe The conference was
an overwhelming success with lots of friendly interaction and discussion among the participants At lunch we were treated to
splendid views from the NCAR terrace and discussions ranging from the importance of the LSR GSR and LGSR velocity
frames to how long the desserts would last with 90 astronomers and the hot Boulder sun From an inventory of the baryons to
the associations between galaxies and Ly α absorbers to the mechanisms by which galaxies obtain and lose gas the
conference covered many topics The results of these endeavors are contained in these pages and eloquently summarized by
