

What is CAT4?

The *Cognitive Abilities Test (CAT)* is a suite of tests that assesses a student's reasoning (thinking) abilities in key areas that support educational development and academic attainment. *CAT4* is the fourth edition of the test and comprises the following sections or batteries which assess different aspects of ability:

Verbal Reasoning Battery – thinking with words

Verbal Classification

Three words are presented which are similar in some way or ways. From a selection of five possible answers, the student must identify a fourth word with similar properties.

The answer is snow because rain, fog and sunshine are all types of weather and snow is also a type of weather.

Verbal Analogies

A pair of connected words is presented alongside a single word. From a selection of five possible answers, the student must select a word to complete the second pair in the same way.

The answer is window, because a carpet goes on a floor and a curtain hangs at a window.

Quantitative (or Numerical) Reasoning Battery – thinking with numbers

Number Analogies

Two pairs of related numbers are presented. From a selection of five possible answers, the student must select a number to complete a third pair.

The answer is 8. Here 1 add 1 makes 2, but that doesn't work for the second pair because 5 add 1 is 6, not 10. Instead, you have to multiply by 2 to get the second part of each pair, so 4 times 2 is 8.

Number Series

A sequence of numbers created by a transformation rule is presented. From a selection of five possible answers, the student must identify the rule and continue the sequence.

The answer is 15. There are two number patterns in this series. The first, third and fifth numbers go down by 1 at a time – 18, 17 then 16. The numbers in between them go up by two at a time – 5, 7 then 9. This means the next number must be 16 minus 1, giving 15.

Analysing Underachievement in Schools Emma Smith, 2005-06-09 Underachievement in school is one of the most widely used terms in education today As a discourse it has been responsible for influencing government policy staffroom discussions as well as the pages of academic journals and the TES It is also a subject which raises questions about what we expect from a fair and equitable education system This book provides a critical analysis of two sides of the underachievement debate at each of the three levels of focus international the UK and the individual On the one hand it will consider the crisis account of falling standards and failing pupils and on the other present an alternative account which urges a re evaluation of the underachievement debate in order to consider who might be underachieving and why

Achieving Next Generation Literacy Maureen Connolly, Vicky Giouroukakis, 2016-04-29 As a teacher what you want most is for your students to learn to immerse themselves in rich and challenging content and leave your classroom better prepared for school and life In English language arts and humanities this includes developing the multifaceted reading writing thinking and communication skills that constitute next generation literacy including the ability to Read complex text independently Develop strong content knowledge through reading writing listening and speaking Tailor communication in response to different audiences tasks purposes and disciplines Comprehend text as well as critique it Value evidence in arguments they read hear or develop Use technology strategically and capably Understand perspectives and cultures that differ from their own But as a teacher you also know how much is riding on THOSE TESTS achievement tests from the national assessment consortia the SAT and ACT and independent state assessments Is it possible to help students succeed on mandated tests without sacrificing your values your creativity and their education Yes it is possible This book shows you how This not a test prep book It is not about drill and kill practices that narrow learning so that students will pass an exam Instead authors Maureen Connolly and Vicky Giouroukakis present a lesson planning approach for the secondary classroom that generates test success as a byproduct of comprehensive literacy learning After a comparative analysis of how current ELA assessments measure literacy they model a

backward design based process for using these test items as a tool to create engaging and effective instruction With 6 sample lessons 42 instructional techniques and tips for differentiation this practical resource will empower you to help the students you love become capable literate individuals who are also well prepared to ace high stakes tests

Teaching Secondary English Mark Pike, 2003-10-30 What the book does extremely well is do describe the way things are in terms of the requirements of the Framework for Teaching English the curriculum and the new specifications and for this reason it is likely to be most useful to those contemplating English teaching in the maintained sector from outside returnees aspiring NQTs or those in the independent sector Times Educational Supplement Instead of taking us yet again on a tour through the four modalities of English this book's tripartite structure takes a refreshingly different approach by offering thought provoking argument grounded in classroom practicality Nick McGuinn University of York Students comments on Teaching Secondary English The book is written in clear digestible terms offering many practical ideas for teaching the key skills and the wide range of material encountered in the English classroom It is the kind of book which can be dipped into which is particularly useful for people who spend most of their time planning lessons Teaching Secondary English is a must for student teachers and NQTs It is a clear comprehensive and practical guidebook dealing not solely with theory and pedagogy but with the very real issues facing new teachers today It is clear that Teaching Secondary English unlike so many textbooks on the subject is written by someone with recent classroom experience and this helps the reader to trust and respect the advice it purports I certainly feel it is grounded in practicalities not pie in the sky theory that will not work in most real classrooms This book enables English teachers to implement change and rise to new challenges while remaining true to an ethically and socially just position which provides the rationale for their vocation The author describes and evaluates recent changes to English teaching brought about by initiatives such as the Literacy Strategy the new A levels and the requirement to focus on spiritual moral social and cultural development Examples of innovative teaching and learning strategies are provided throughout The author helps teachers to foster keen readers writers and communicators He shows how they can enable their students to acquire skills and knowledge as well as to recognize the value of aesthetic experience emotional literacy and spiritual and moral response to literature in their own lives and in their communities This book is essential reading for PGCE students as well as practising teachers and all those involved in English in education

Entwistle,2018-03-05 Educational sociologists have paid relatively little attention to children in middle childhood ages 6 to 12 whereas developmental psychologists have emphasized factors internal to the child much more than the social contexts in explaining children s development Children Schools and Inequality redresses that imbalance It examines elementary school outcomes e g test scores grades retention rates in light of the socioeconomic variation in schools and neighborhoods the organizational patterns across elementary schools and the ways in which family structure intersects with children s school performance Adding data from the Baltimore Beginning School Study to information culled from the fields of sociology child development and education this book suggests why the gap between the school achievement of poor children and those who are better off has been so difficult to close Doris Entwistle Karl Alexander and Linda Olson show why the first grade transition how children negotiate entry into full time schooling is a crucial period They also show that events over that time have repercussions that echo throughout children s entire school careers Currently the only study of this life transition to cover a comprehensive sample and to suggest straightforward remedies for urban schools Children Schools and Inequality can inform educators practitioners and policymakers as well as researchers in the sociology of education and child development
