

Physics notes

Energy stores and systems:

Energy never created or destroyed. Only ever transferred between different forms and objects. When transferred the energy is stored in an energy store:

- Thermal
- Kinetic
- Gravitational potential
- Electrostatic
- Magnetic
- Elastic
- Chemical
- Nuclear

Can be transferred mechanically, heating, electrically, light or sound waves, radiation. A system is a word for a single object or a group of objects. An open system can gain or lose energy as it interacts with the outside world. Closed systems are separate from the outside world, neither matter nor energy can enter or leave. Work done two main types- mechanical and electrical. Mechanical - force to move an object. Electrical; - done when current flows.

Kinetic and potential energy stores:

Kinetic energy of an object is the energy that it possesses, due to its motion. Anything that's moving has kinetic energy. How much energy it has depends on two things: its speed and its mass. Speed - the faster the object is moving the more kinetic energy. Mass - more mass more kinetic energy.

kinetic energy equation:

$$E_k = \frac{1}{2}mv^2$$

E_k = kinetic energy (J)

m = mass (kg)

v = velocity or speed (m/s)

E_k = kinetic energy of object

m = mass of object

v = speed of object

Year 7 Physics Notes

Marcel A. Müller

Year 7 Physics Notes:

Immerse yourself in the artistry of words with is expressive creation, Discover the Artistry of **Year 7 Physics Notes** . This ebook, presented in a PDF format (*), is a masterpiece that goes beyond conventional storytelling. Indulge your senses in prose, poetry, and knowledge. Download now to let the beauty of literature and artistry envelop your mind in a unique and expressive way.
