affects your energy bodies typical psychological therapy cognitive or behavioral does not cure those effects Trauma must be addressed in layers that include all your bodies energetic and physical This is why resolving trauma takes much time On the emotional level you begin to doubt who you are You might experience anxiety or depression and forget who you are You worry about what is going to happen in life and whether things will ever get better What does that do It causes problems on the emotional and the spiritual levels because you forget the marvelousness of who you are Your happiness and contentment come from within It does not depend on your situation After experiencing a trauma everything has changed and you have to find the new you What you believe about yourself is going to assist your recovery If you believe you are only useful if you can walk and now you can no longer walk your life loses its meaning based on your beliefs You need new beliefs Focus on yourself during this healing process You are the most important individual in this whole practice When you do this for yourself your healing affects others increasing the light in the world **The Cosmology of Love** Edmund
