The Contested Role of Education in Conflict and Fragility Zehavit Gross,Lynn Davies,2015-06-17 This book brings together new thinking on education s complex and evolving role in conflict and fragility The changing nature of conflict from inter to intra state and

with shifting geopolitical power balances demands a reconceptualization of where education is positioned. Claims that education on its own can be an agent of conflict transformation are disputed. Deliberate attempts at peace education are not without critics and controversies. This collection aims to generate new realism from empirical and reflective accounts in a variety of countries and political contexts as well as provide innovative methodological approaches to the study of education and conflict. The particular distinctiveness of the volume is the emphasis on contested; it includes the debates and disagreements on the many faces of education in conflict as well as material on teaching controversial issues in fragile contexts. Crucially, it underscores how education itself exists within highly contested projects of state, nation, and region building. As well as overview comparative chapters, the collection encompasses a range of specific contexts geographically and educationally: Algeria, Canada, El Salvador, Israel, Kenya, Mexico, Morocco, Nepal, Tunisia, UK, and US, with settings that include schools, higher education, and refugee camps. Focuses range from analyses of education in historical conflicts to contemporary issues such as post-Arab Spring transformations. Perennial concerns about religion, colonialism, protest, integration, cohesion, emergencies, globalization, and narrative are given new slants. Yet in spite of the debates, a cross-cutting consensus emerges as the crucial need for critical pedagogy and critical theory if education is to make any mark at all on conflict and fragility.

Cultures of Curriculum Pamela Bolotin Joseph, 2011-05-20. Using cultures of curriculum as a lens, this clear, compelling text reveals and critically examines the belief systems and classroom practices of curricular orientations in contemporary American society. It is designed to foster awareness, examination, and deliberation about the curricula planned for and carried out in classrooms and schools, to inspire conversations about theory and practice as well as political, social, and moral issues, and to expand critical consciousness about approaches to curriculum and practice. Readers are encouraged to give serious attention to the issues this book raises for them and to join with their colleagues, students, and communities in considering how to create curricula with purpose and congruent practices and to reculture classrooms and schools. A framework of inquiry is presented to facilitate such reflection and to accomplish these goals.

Cultures of Curriculum, Second Edition Introduces the field of curriculum studies by describing theories and questions pertinent to curriculum inquiry. Describes the process of curriculum leadership drawing from historical and contemporary research on curriculum change and transformation. Presents the concept of cultures of curriculum as a way of thinking of curriculum as cultural text encompassing histories, norms, beliefs, values, roles, and environments. Connects theory to practice by describing curricular orientations as depicted in practice, providing educators with approaches to instruction, planning, and assessment for creating intentional practices in classrooms and schools. Uses a heuristic that helps educators to understand curricular orientations, examine curriculum in classrooms and schools, and reflect upon their own beliefs and practices. Integrates moral and political discourse into discussions of curriculum orientations so that educators can recognize, question, and challenge aims and actions by examining dominant paradigms and both their direct and unforeseeable influences upon schooling. Changes in the

The Routledge Companion to International Children's Literature John Stephens, 2017-09-11 Demonstrating the aesthetic cultural political and intellectual diversity of children s literature across the globe *The Routledge Companion to International Children's Literature* is the first volume of its kind to focus on the underserved regions of the world With particular focus on Asia Africa and Latin America the collection raises awareness of children s literature and related media as

they exist in large regions of the world to which mainstream European and North American scholarship pays very little attention. Sections cover Concepts and theories, Historical contexts and national identity, Cultural forms and children's texts, Traditional story and adaptation, Picture books across the majority world, Trends in children's and young adult literatures. Exposition of the literary, cultural and historical contexts in which children's literature is produced, together with an exploration of intersections between these literatures and more extensively researched areas, will enhance access and understanding for a large range of international readers. The essays offer an ideal introduction for those newly approaching literature for children in specific areas, looking for new insights and interdisciplinary perspectives, or interested in directions for future scholarship.

Making Americans Gary D. Schmidt, 2013-12-01 American children need books that draw on their own history and circumstances, not just the classic European fairy tales. They need books that enlist them in the great democratic experiment that is the United States. These were the beliefs of many of the authors, illustrators, editors, librarians, and teachers who expanded and transformed children's book publishing between the 1930s and the 1960s. Although some later critics have argued that the books published in this era offered a vision of a safe, secure, simple world without injustice or unhappy endings, Gary D. Schmidt shows that the progressive political agenda shared by many Americans who wrote, illustrated, published, and taught children's books had a powerful effect. Authors like James Daugherty, Laura Ingalls Wilder, Lois Lenski, Ingri and Edgar Parin d'Aulaire, Virginia Lee Burton, Robert McCloskey, and many others addressed directly and indirectly the major social issues of a turbulent time: racism, immigration, and assimilation, sexism, poverty, the Great Depression, World War II, the atomic bomb, and the threat of a global cold war. The central concern that many children's book authors and illustrators wrestled with was the meaning of America and democracy itself, especially the tension between individual freedoms and community ties. That process produced a flood of books focused on the American experience and intent on defining it in terms of progress toward inclusivity and social justice. Again and again, children's books addressed racial discrimination and segregation, gender roles, class differences, the fate of Native Americans, immigration, and assimilation, war, and the role of the United States in the world. Fiction and nonfiction for children urged them to see these issues as theirs to understand and in some ways theirs to resolve. *Making Americans* is a study of a time when the authors and illustrators of children's books consciously set their eyes on national and international sights with the hope of bringing the next generation into a sense of full citizenship.
