The federal government's No Child Left Behind Act has thrust high stakes testing, its goals, methods, and consequences into the educational limelight. The four-fold purpose of this book is to describe the nature of high stakes testing, identify types of collateral damage that have attended the testing programs, analyze methods different groups of people have chosen for coping with the damage, and suggest lessons to be learned from the high stakes testing experience. The six groups of people whose coping strategies are inspected include politicians and their staffs, educational administrators and their staffs, parents, and the public, test makers, and test administrators, teachers, and students. Importantly, the author avoids aligning himself with the test-bashing rhetoric of those who oppose high stakes testing, especially the No Child Left Behind Act. Key features of this outstanding new book include illustrative cases. The book offers more than 350 cases of collateral damage from high stakes testing and people's coping strategies as reported in newspapers over the 2002-2004 period, background perspectives. Part I examines the influence of high stakes testing on 1) what schools teach, 2) how student progress is evaluated, 3) how achievement standards are set, and 4) how test results are used, participant responses. Part II, which is the heart of the book, devotes a separate chapter to the coping strategies of each of the major participants in the high stakes testing movement: politicians and their staffs, educational administrators and their staffs, parents, and the public, test makers, and test givers, teachers, and students. Summary chapter. The last chapter, *Lessons to Learn*, offers suggestions for minimizing collateral damage by adopting alternative approaches not used in the creation of our current high stakes testing programs, particularly
