Herodotus in the Long Nineteenth Century Thomas Harrison, Joseph Skinner, 2020-03-26 Explores the many different ways in which Herodotus Histories were read and understood during a momentous period of world history [A History of European Literature](#) Walter Cohen, 2017-01-19 Walter Cohen argues that the history of European literature and each of its standard periods can be illuminated by comparative consideration of the different literary languages within Europe and by the ties of European literature to world literature World literature is marked by recurrent systematic features outcomes of the way that language and literature are at once the products of major change and its agents Cohen tracks these features from ancient times to the present distinguishing five main overlapping stages Within that framework he shows that European literatures ongoing internal and external relationships are most visible at the level of form rather than of thematic statement or mimetic representation European literature emerges from world literature before the birth of Europe during antiquity whose Classical languages are the heirs to the complex heritage of Afro Eurasia This legacy is later transmitted by Latin to the various vernaculars The uniqueness of the process lies in the gradual displacement of the learned language by the vernacular long dominated by Romance literatures That development subsequently informs the second crucial differentiating dimension of European literature the multicontinental expansion of its languages and characteristic genres especially the novel beginning in the Renaissance This expansion ultimately results in the reintegration of European literature into world literature and thus in the creation of today's global literary system The distinctiveness of European literature is to be found in these interrelated trajectories [A History of Victims of Crime](#) Stephen Strauss-Walsh, 2023-05-19 This book examines the evolution of the contemporary crime victim's procedural place within modern Western societies Taking the history of the Irish crime victim as a case study the work charts the place of victims within criminal justice over time This evolves from the expansive latitude that they had during the eighteenth century to their major relegation to witness and informer in the nineteenth and back to a more contemporary recapturing of some of their previous centrality The book also studies what this has meant for the position of suspects and offenders as well as the population more generally Therefore some analysis is devoted to examining its impact on an offender's right to fair trial and social forms It is held that the modern crime victim has transcended its position of marginality This happened not only in law but as the consequence of the victim's new role as a key sociopolitical stakeholder This work flags the importance of victim rights conferrals and the social transformations that

engendered such trends In this way victim re emergence is evidenced as being not just a legal change but a consequence of several more recent sociocultural transformations in our societies The book will be of interest to researchers academics and policy makers in criminal law human rights law criminology and legal history
