The Netherlands Report Corporate Governance 1997:

Corporate Governance and Economic Performance Klaus Gugler, 2001 Corporate governance has time and again been the subject of extensive scrutiny and controversy Much of the debate of the 1960s and 1970s focused on the managerial corporation in the USA and the UK inspired by the seminal work of Berle and Means 1932 The separation of ownership from control has been blamed for spectacular business failures While there is ample evidence about corporate governance and performance in the USA and the UK very little is known about the functioning of corporate governance elsewhere Corporate Governance and Economic Performance presents evidence about corporate governance and performance in a large number of countries It is the result of a collective research effort by the members of the European Corporate Governance Network ECGN which brought together country teams familiar with the language and corporate culture of their respective countries The volume focuses on Austria Belgium Germany France Italy Japan the Netherlands Spain Turkey the United Kingdom and the United States While the owner manager conflict appears to dominate in the USA and the UK the large small shareholder conflict is important in Continental Europe Based on this evidence the authors derive important policy implications for capital market reform in Europe

International Standardisation of Good Corporate Governance L. van den Berghe, 2012-12-06 In International Standardisation of Good Corporate Governance Best Practices for the Board of Directors the Academy of Directors AoD presents a multidisciplinary approach for the governance of a company The AoD also aims to use the interaction between the academic and the business world to change the environment in which companies work This task is realised in different ways by conducting applied scientific research creating a large pool of professional experience and networking within the AoD confronting these research results with the practical experience of the members publishing these results and organising training programmes The AoD therefore collaborates very closely with the academic world The Vlerick School of Management was the co founder of the AoD together with a great number of national and international business partners The foundation of the AoD goes back to the initiative of its president Mr L H Verbeke Loeff Claey's Verbeke He was convinced that the increasing international interest in corporate governance would also affect Belgian companies but that there was a need for an indigenous coherent view of corporate governance Being at the cross roads of different cultures and languages and at the same time being a very open economy Belgium could not simply copy another country's code on good corporate governance Therefore the initiative was taken to set up a broad international overview of the best practices for the board of directors which is presented in this volume This analysis is not only oriented towards the famous codes but aims to highlight as well the practical applications and problems faced in implementing these suggestions Consequently special attention is given to the best practices for family businesses and medium sized companies
