TRANSLATED BY DAVID L. SWEET

Murder, The Hope of Women, a twenty-five minute opera composed in 1919 by Paul Hindemith • The novel *Theodor* by Robert Walser • The letters of Milena Jesenska to Franz Kafka • Heinrich von Kleist burns the manuscript of *Robert Guiscard, The Duke of the Normans* and attempts to enlist in Napoleon's army when the poet Wieland informs him of his admiration for this text • Missing, the poems of Robert Creeley, that littered the hardwood floor of Brautigan's house in Bolinas, on drunken nights; Brautigan would gather them in the morning and put them in a bowl on the piano, "for posterity," he'd say • The *Journal* of Annemarie Schwarzenbach, destroyed by her mother • *La Confusa*, a comedy by Miguel de Cervantes • In 1933 and from 1937 to 1938, Jean Giono shot fragments of poetic films without characters; none of the works exist any longer • The contents of a telephone conversation between Stalin and Pasternak after the arrest of Ossip Mandelstam • Pierre Guyotat's head of hair • Jerome David Salinger since 1959 • The "line" of Apelles. • Because his editors refused to publish *Stephen Hero*, James Joyce threw the manuscript into the fire in 1905; at the cost of some burns, his companion, Nora, saved a fifth of the text

Saad-Filho, 2021-09-27 This book offers an analysis of the causes development and likely consequences of the Covid 19 pandemic for global neoliberalism The analysis will draw upon the author's previous work on neoliberalism and on its twin crises the economic crisis the Global Financial Crisis GFC ongoing since 2007 and subsequently the crisis of political democracy that has been associated with the rise of spectacular authoritarian leaders in several countries The approach is grounded on Marxist political economy The book argues that the Covid 19 pandemic emerges out of this context of deep inequalities and crises in the economy and in politics and it is likely to reinforce the exclusionary tendencies of neoliberalism with detrimental implications both for economic prosperity and for democracy In turn the pandemic has revealed the limitations of neoliberalism like never before with implications for the legitimacy of capitalism itself and opening unprecedented spaces for the left This book will be of interest to academics in economics international relations political science political economy sociology and development studies *The Routledge Companion to Gender and Borderlands* Zalfa

Place/Culture/Representation James S. Duncan, David Ley, 2013-04-15 Spatial and cultural analysis have recently found much common ground, focusing in particular on the nature of the city. *Place Culture Representation* brings together new and established voices involved in the reshaping of cultural geography. The authors argue that as we write our geographies, we are not just representing some reality; we are creating meaning. Writing becomes as much about the author as it is about purported geographical reality. The issue becomes not scientific truth as the end but the interpretation of cultural constructions as the means. Discussing authorial power, discourses of the other, texts and textuality, landscape metaphor, the sites of power, knowledge relations, and notions of community and the sense of place, the authors explore the ways in which a more fluid and sensitive geographer's art can help us make sense of ourselves and the landscapes and places we inhabit and think about.

Decolonizing Science in Latin American Art Joanna Page, 2021-04-15 Projects that bring the hard sciences into art are increasingly being exhibited in galleries and museums across the world. In a surge of publications on the subject, few focus on regions beyond Europe and the Anglophone world. *Decolonizing Science in Latin American Art* assembles a new corpus of art-science projects by Latin American artists, ranging from big-budget collaborations with NASA and MIT to homegrown experiments in artists' kitchens. While they draw on recent scientific research, these art projects also decolonize science. If increasing knowledge of the natural world has often gone hand in hand with our objectification and exploitation of it, the artists studied here emphasize the subjectivity and intelligence of other species, staging new forms of collaboration and co-creativity beyond the human. They design technologies that work with organic processes to promote the health of ecosystems and seek alternatives to the logics of extractivism and monoculture farming that have caused extensive ecological damage in Latin America. They develop do-it-yourself open-source commons-based practices for sharing creative and intellectual property. They establish critical dialogues between Western science and indigenous thought, reconnecting a disembodied, abstracted form of knowledge with the cultural, social, spiritual, and ethical spheres of experience from which it has often been excluded. *Decolonizing Science in Latin American Art* interrogates how artistic practices may communicate, extend, supplement, and challenge scientific ideas. At the same time, it explores broader questions in the field of art, including the relationship between knowledge, care, and curation; nonhuman agency; art and utility; and changing approaches to participation. It also highlights important contributions by Latin American thinkers to themes of global significance, including the Anthropocene, climate change, and environmental justice.
