The Mind A Users Guide:

The Mind Raj Persaud, Royal College of Psychiatrists, 2007 Although we are all born with brains and minds which are amazing those who research and treat the symptoms of psychological and psychiatric disorder firmly believe we would all find our lives enhanced by a user's guide to the mind. We are supposed to be living in more enlightened times yet it seems that more people than ever are suffering from mental health problems. In fact statistics show 1 in 4 people will experience some kind of mental health disorder in the course of their life. 1 in 6 of us will suffer from depression most commonly between the ages of 25 and 44. 1 in 10 people are likely to suffer from disabling anxiety at some stage in their life. Edited by Dr Raj Persaud and published in collaboration with the Royal College of Psychiatrists. The Mind A User's Guide has been written by distinguished experts and offers information on the latest research into brain and mind sciences. It gives distinctive descriptions of behaviour, feelings and thoughts relating to a variety of conditions including Addictions, Body Image and Bipolar Disorders, Depression and OCD and helps us to clarify and understand symptoms and treatments. A Mind For Numbers Barbara Oakley, PhD, 2014-07-31 The companion book to COURSERA's wildly popular massive open online course Learning How to Learn. Whether you are a student struggling to fulfill a math or science requirement or you are embarking on a career change that requires a new skill set, A Mind for Numbers offers the tools you need to get a better grasp of that intimidating material. Engineering professor Barbara Oakley knows firsthand how it feels to struggle with math. She flunked her way through high school math and science courses before enlisting in the army immediately after graduation. When she saw how her lack of mathematical and technical savvy severely limited her options both to rise in the military and to explore other careers, she returned to school with a newfound determination to retool her brain to master the very subjects that had given her so much trouble throughout her entire life. In A Mind for Numbers, Dr Oakley lets us in on the secrets to learning effectively: secrets that even dedicated and successful students wish they'd known earlier. Contrary to popular belief, math requires creative as well as analytical thinking. Most people think that there's only one way to do a problem when in actuality there are often a number of different solutions; you just need the creativity to see them. For example, there are more than three hundred different known proofs of the Pythagorean Theorem. In short, studying a problem in a laser-focused way until you reach a solution is not an effective way to learn. Rather, it involves taking the time to step away from a problem and allow the more relaxed and creative part of the brain to take over. The learning strategies in this book apply not only to math and science but to any subject in which we struggle. We all have what it takes to excel in areas that don't seem to come naturally to us at first, and learning them does not have to be as painful as we might think.

Designing with the Mind in Mind Jeff Johnson, 2013-12-17 In this completely updated and revised edition of Designing with the Mind in Mind, Jeff Johnson provides you with just enough background in perceptual and cognitive psychology that user interface UI design guidelines make

intuitive sense rather than being just a list of rules to follow. Early UI practitioners were trained in cognitive psychology and developed UI design rules based on it. But as the field has evolved since the first edition of this book, designers enter the field from many disciplines. Practitioners today have enough experience in UI design that they have been exposed to design rules, but it is essential that they understand the psychology behind the rules in order to effectively apply them. In this new edition, you'll find new chapters on human choice and decision making, hand-eye coordination, and attention, as well as new examples, figures, and explanations throughout. Provides an essential source for user interface design rules and how, when, and why to apply them. Arms designers with the science behind each design rule, allowing them to make informed decisions in projects and to explain those decisions to others. Equips readers with the knowledge to make educated tradeoffs between competing rules, project deadlines, and budget pressures. Completely updated and revised, including additional coverage on human choice and decision making, hand-eye coordination, and attention, and new mobile and touch screen examples throughout. **Design**

for the Mind Victor Yocco, 2016-06-13 Summary: Design for the Mind: Seven Psychological Principles of Persuasive Design teaches web designers and developers how to create sites and applications that appeal to our innate natural responses as humans. Author Victor Yocco, a researcher on psychology and communication, introduces the most immediately relevant and applicable psychological concepts, breaks down each theory into easily digested principles, then shows how they can be used to inform better design. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the Technology: Designers and design team members need to think about more than just aesthetics. How do you handle short attention spans? How does your design encourage users to engage, browse, or buy? Fortunately, there are psychological principles that you can use in your design to anticipate and benefit from how humans think, behave, and react. About the Book: Design for the Mind: Seven Psychological Principles of Persuasive Design teaches you to recognize how websites and applications can benefit from an awareness of our innate natural responses as humans and to apply the same principles to your own designs. This approachable book introduces the psychological principles, deconstructs each into easily digestible concepts, and then shows how you can apply them. The idea is to deepen your understanding of why people react in the ways they do. After reading the book, you'll be ready to make your work more psychologically friendly, engaging, and persuasive. What's Inside: Making design persuasive. Encouraging visitors to take action. Creating enduring messages. Meeting the needs of both engaged and disengaged visitors. Becoming a strategic influencer. Applying theory with case studies and real-world examples. About the Reader: This book is for web and UX designers and developers, as well as anyone involved in customer-facing digital products. About the Author: Victor Yocco, PhD, is a research director at a Philadelphia-based digital design firm. He received his PhD from The Ohio State University, where his research focused on psychology and communication in informal learning settings. Victor regularly writes and speaks on topics related to the application of psychology to design and addressing the culture of alcohol use in design and technology.
