Qur'an: English translation with parallel Arabic text ,2010-04-08 The Qur an believed by Muslims to be the word of God was revealed to the Prophet Muhammad 1400 years ago Recognized as the greatest literary masterpiece in Arabic the sacred text has nevertheless remained difficult to understand in its English translations First published in 2004 M A S Abdel Haleem s translation has been acclaimed for its success in avoiding archaism and cryptic language to produce a version that is both faithful to the original and easy to read Now for the first time it is published with the original Arabic text to give a greater appreciation and understanding of the holy book The traditional Arabic calligraphic pages are displayed alongside the English translation which has been revised for this new edition This fine binding edition features leather binding gold page edges a ribbon marker and a slip case A useful general introduction on the revelation stylistic features issues of interpretation and translation of the Qur an is included together with summaries of each sura essential footnotes and an index The verses are individually numbered to facilitate comparison with the Arabic It is an edition both for those familiar with the Qur an and for those coming to it for the first time the message of the Qur an was directly addressed to all people regardless of class gender or age and this dual language edition is equally accessible to everyone God, Evolution & Science William Stolzman,2020-04-23 God Evolution Science How Our World Evolved from God presents a new approach for linking God energy and our material world in an evolutionary way Energy is conservative and it exists in two forms potential and kinetic Scientists have well established that our physical world began as a singular kinetic Big Bang Consequently before that event there had to exist a singular potential energetic reality which I name the Almighty This potential reality is forward leaning and thus has the unidirectional dimension of time which must also be quantized Since energy is oriented toward establishing systems the Almighty must also have a systemic aspect The author establishes that evolution is not only biological but logical He shows how from the Almighty logically evolved a quantized bidirectional four dimensional field By progressively breaking the symmetries of this field he is able to show how the four forces of physics logically evolved He subsequently shows how our world as we observe it today logically evolved from the Almighty Whether this Almighty is impersonal or personal is discussed at length Finally the author also shows that beyond the entropic decay of our world our physical world will end a Big Collapse Nonetheless because energy is conservative and eternal the author shows how there

remains the logistical possibility of a transcendently evolved afterlife in the Almighty
