[Foundations of Anasazi Culture](#) Paul F. Reed,2002-08-29 This major synthesis of work explores new evidence gathered at Basketmaker III sites on the Colorado Plateau in search of further understanding of Anasazi development Since the 1960s large scale cultural resource management projects have revealed the former presence of Anasazi within the entire northern Southwest These discoveries have resulted in a greatly expanded view of the BMIII period A D 550 750 which immediately proceeds the Pueblo phase Particularly noteworthy are finding of Basketmaker

remains under those of later periods and in sites with open settings as opposed to the more classic Basketmaker cave and rock shelter sites. Foundations of Anasazi Culture explores this new evidence in search of further understanding of Anasazi development. Several chapters address the BMII-BMIII transition, including the initial production and use of pottery, greater reliance on agriculture, and the construction of increasingly elaborate structures. Other chapters move beyond the transitional period to discuss key elements of the Anasazi lifestyle, including the use of gray, red, and white ware ceramics, pit structures, storage cists, surface rooms, full dependence on agriculture, and varying degrees of social specialization and differentiation. A number of contributions address one or more of these issues as they occur at specific sites. Other contributors consider the material culture of the period in terms of common elements in architecture, ceramics, lithic technology, and decorative media. This work on BMIII sites on the Colorado Plateau will be useful to anyone with an interest in the earliest days of Anasazi civilization.
