

THE NEW MRS D

The illustration is a vibrant, stylized scene. In the foreground, a woman in a bright pink, long-sleeved dress is running towards the left, her dress flowing behind her. In the background, a woman with blonde hair is riding a dark brown horse along the shoreline. The beach is sandy, and the ocean is a deep blue with white-capped waves. The sky is a lighter blue with a few white birds flying. The overall style is reminiscent of mid-20th-century graphic design.

Fischer, 2013-06-17 How do people develop in their important relationships How do two people come together to form a new

close relationship How do relationships affect or determine who we are and who we become These questions should be central to the study of mind and development but most researchers neglect relationships and focus instead on analyses of individuals as if people were basically alone experiencing occasional fleeting moments with other people Research based on this individualist assumption has dominated the behavioral and clinical sciences but there are other voices and they are growing In this book many of the scholars who are moving relationships and attachments back to the center of human development outline their central concepts findings and perspectives People are fundamentally social and relationships are part of the fabric of being human forming an essential foundation that molds each person s mind and action A mind does not reside in one person but in relationships and communities composed of many people s interconnected minds which mutually support and define each other From the start and throughout life each person develops strengths and vulnerabilities in important relationships in communities and cultures Those relationships are so central to each person s activity and experience that without them no scientific explanation can even begin to analyze mind and action There is no mind without other people There is no psychological vulnerability that does not involve others The contributors to this book aim to establish a firm foundation for the role of relationships in human activity and health and to promote strong research by bringing together in one place most of the best research and theory on development and relationships Their goal is to stimulate a more radical inclusion of relationships in mind an ecological focus on the ways that relationships constitute action feeling and thought
