NOW WITH A NEW CHAPTER

# *The* Noonday Demon

"All encompassing, brave,  
and deeply humane. . . .

It is open-minded,  
critically informed, and  
poetic at the same time,  
and despite the nature  
of its subject it is written  
with far too much élan  
and elegance ever to  
become depressing itself."

BERNSTEIN,

*Coping With Depression* Jon G. Allen, 2007-04-02 Distilling years of experience in educating psychiatric patients and their families about depression Jon Allen has written a practical book that addresses the challenges depressed patients face on the road to recovery Allen advocates approaching depression by focusing on the importance of hope and he helps patients understand depression through two simple ideas catch 22 and stress pileup This book conveys how the symptoms of depression impede all the things depressed persons must do to recover thus defusing self criticism while encouraging patients to take satisfaction in small steps toward improvement And the concept of stress pileup encompasses a developmental perspective respecting the full range of accumulated biological psychological and interpersonal stresses that play into depression This broad understanding helps patients become more compassionate toward themselves and puts them in a stronger position to make use of professional care Coping With Depression is written for a general audience including depressed persons and their family members as well as professionals seeking a readable integration of current knowledge that they can use to educate their patients Although written in nontechnical language the book provides a sophisticated and comprehensive understanding of the psychological development of depression the neurobiology of the illness and the full range of evidence based treatment modalities All material is buttressed by extensive references to theoretical clinical and research literature Coping With Depression emphasizes the concept of agency encouraging readers to take an active role in their recovery Countering today's trend toward exclusive reliance on antidepressant medication the book employs the perspective of developmental psychopathology to integrate psychosocial and neurobiological knowledge The book explains how biological vulnerability is intertwined with stress stemming from insecure attachment childhood adversity stressful life events emotional conflicts and problems in close relationships Going far beyond the chemical imbalance the author illustrates how the experience of depression is linked to changes in patterns of brain activity as evidenced by neuroimaging studies

Coping With Depression will help readers understand the development of depression from a biopsychosocial perspective appreciate how depression is compounded by related conditions including bipolar disorder anxiety disorders substance abuse personality disorders general medical conditions and suicidal states understand how recovering from depression entails working on many fronts including improving physical health participating in pleasurable activities countering negative thinking resolving internal conflicts and above all establishing more stable and secure attachment relationships become knowledgeable about the treatment options that facilitate coping including cognitive behavioral interpersonal and psychodynamic psychotherapy as well as medication and combined treatment appreciate the centrality of hope in recovery from depression and the challenges to hope that depression poses To maintain hope patients their family members and clinicians must face the seriousness of the illness of depression and the daunting obstacles to recovery including catch 22 in all of its manifestations Throughout the book Allen reiterates the theme of agency depressed persons can use their intelligence to understand their illness and do something to recover and remain well making use of help from others along the way

Women Who Think Too Much Susan Nolen-Hoeksema, 2004-02-01 From one of the nation's preeminent experts on women and emotion a breakthrough new book about how to stop negative thinking and become more productive It's no surprise that our fast paced overly self analytical culture is pushing many people especially women to spend countless hours thinking about negative ideas feelings and experiences Renowned psychologist Dr Susan Nolen Hoeksema calls this overthinking and her groundbreaking research shows that an increasing number of women more than half of those in her extensive study are doing it too much and too often hindering their ability to lead a satisfying life Overthinking can be anything from fretting about the big questions such as What am I doing with my life to losing sleep over a friend's innocent comment It is causing many women to end up sad anxious or seriously depressed and Nolen Hoeksema challenges the assumption heralded by so many pop psychology pundits of the last several decades that constantly expressing and analyzing our emotions is a good thing In Women Who Think Too Much Nolen Hoeksema shows us what causes so many women to be overthinkers and provides concrete strategies that can be used to escape these negative thoughts move to higher ground and live more productively Women Who Think Too Much will change lives and is destined to become a self help classic
