International Law and the Protection of Namibia's Territorial Integrity S. Akweenda, 2023-07-24 International law is not static it develops constantly Namibia is classic case illustrating the changing law of nations International Law and the Protection of Namibia's Territorial Integrity Boundaries and Territorial Claims demonstrates this with an analysis of the legal and factual elements present in the creation boundaries and territorial claims of Namibia and the determinations of the League of Nations and the political organs of the United Nations which developed and clarified the rules of international law Namibia's unique international status and diplomatic history requires the consideration of a large number of different topics within public international law Some of these issues are very complex and technical as they involve major questions of international law and politics Through the use of primary sources case law state practice and the opinions of eminent jurists the author addresses these challenging and revealing issues Anyone interested in public international law international relations political science history or geography will appreciate the way that this work covers the interesting and informative changes in this revealing nation *The Canadian Short Story* Reingard M. Nischik, 2007 Beginning in the 1890s reaching its first full realization by modernist writers in the 1920s and brought to its heyday during the Canadian Renaissance starting in the 1960s the short story has become Canada's flagship genre It continues to attract the country's most accomplished and innovative writers today among them Margaret Atwood Mavis Gallant Alice Munro Carol Shields and many others Yet in contrast to the stature and popularity of the genre and the writers who partake in it surprisingly little literary criticism and theory has been devoted to the Canadian short story This collection redresses that imbalance by providing the first collection of critical interpretations of a range of thirty well known and often anthologized Canadian short stories from the genre's beginnings through the twentieth century A historical survey of the genre introduces the volume and a timeline comparing the genre's development in Canada the US and Great Britain via representative examples completes it The collection is

geared both to specialists in and to students of Canadian literature For the latter it is of particular benefit that the volume provides not only a collection of interpretations but a comprehensive introduction to the history of the Canadian short story Reingard M Nischik is professor and chair of American Literature at the University of Constance Germany *The Little Orange Fish* Asmaa Emara,2020 Selected Water Resources Abstracts ,1978 Carol Shields and the Extra-Ordinary Marta Dvorak,Manina Jones,2007-04-19 Claiming the ordinary and extra ordinary as critical categories contributors to this volume explore the philosophical and literary import of Carol Shields s writing its complex play with genre and narrative technique its re valuing of domesticity and gendered perspective and the social critique implicit in its gentle satirical impulses South Africa's water governance hydraulic mission (1912-2008) in a WEF-Nexus context Johann W.N. Tempelhoff,2018-12-01 Geologists physicists and ecologists currently promote the idea of a post Holocene epoch the Anthropocene As a result of constant innovation and modernisation in the fields of engineering natural science management studies and environmental studies there has been a growing awareness of the intrinsic interaction between humankind and the environment Humankind has become part of the environmental dynamics to the extent that they are literally able to change ecosystems Nowhere is the impact more evident than in the anthropogenic engagement with the hydrosphere from the smallest pool of water to the earth s atmosphere Comprehensive infrastructure development in water and sanitation the growing trend to seek additional resources in the form of groundwater desalinated seawater and recycled wastewater as well as special attention being given to capturing and preserving rainwater bear evidence of a timely response to climate change population growth and rapid development in many water stressed regions of the world The purpose of the book is to provide a historical overview of the manner in which South Africa s water resources have been governed from a time when the Union of South Africa was formed in 1910 up to 2008 a time of a growing global awareness of the potential impact that climate change may have on water resources in a key region of southern Africa notable for increasing levels of aridity and more erratic rainfall patterns This focus on the history of water affairs in South Africa makes it possible for scholars to comprehend the contemporary transitions made in the country s water governance system since the establishment in 2014 of the Department of Water and Sanitation The focus is on the Water Energy Food nexus a strategy which holistically contemplates the governance and use of water from the perspective of the interconnection between water energy and food as resources *Stealing Home* Sandy Burgess Livermore,2010-08 A story of life and all its complexity is all set to touch everyone s heart as author Sandy Livermore releases through Xlibris *Stealing Home* Readers will embark on a unique odyssey through life as the author shares her enduring memories in this wonderful account based on a true story *Stealing Home* is a gripping story that provides the account of one life based on a true story Throughout this book Livermore shares her life expedition from childhood through single parenting two children from two failed marriages to the arrival of a charmer bond as her third It shows her that despite life s obstacles and accomplishments she scrambled through over the

years there is still a Happily Ever After for everyone and that home is the best place to be This release will teach readers endurance and strength and offers hope and inspiration *South African Scope* ,1973 **Dams in Africa** Cb Neville Rubin,William M. Warren,2014-04-04 First published in 1968 The present volume originated in a seminar which was conducted at the School of Oriental and African Studies of the University of London during the 1965 66 academic session With the possible exception of railways there have been no projects in Africa of comparable size and implications to the giant dams involving as they do such un paralleled commitment of resources with corresponding social political and legal consequences Some of these consequences have been considered in the essays presented here both in the specific context of particular projects and as in the more general context of comparative surveys by experts who were with two exceptions present at the seminar **The Atlas of African Affairs** Ieuan L.I. Griffiths,2013-06-17 The Atlas of African Affairs is divided into five sections dealing with environmental historical political and economic issues and with Southern Africa Throughout the book presents an interdisciplinary integrated perspective on African affairs Most of the chapters deal with continent wide themes and are illustrated by maps of Africa as a whole drawn to a standardised outline of the same map projection and scale Other chapters often by way of example discuss parts of the continent or individual countries and are illustrated with appropriate maps The basic format of integrated text and maps is supplemented by guides to further reading at the end of each section as well as a series of detailed statistical tables at the end of the book Inland Waters of Southern Africa: An Ecological Perspective B.R. Allanson,R.C. Hart,J.H. O'Keeffe,R.D. Robarts,2012-12-06 Limnology the study of inland waters had its genesis in Europe about the turn of the century The studies of Forel on Lake Geneva were of seminal value at this time It prospered under the early guidance of Thienemann Naumann and Wesenberg Lund in Europe and soon transplanted of Birge and Juday in North America to name just a few early spirits Now limnology is a respectable scientific discipline taught at many universities and limnologists are recognized as important contributors to our understanding of how this fragile spaceship functions All this acknowledged it must also be acknowledged that limnology is not yet a globally comprehensive science To be sure much is known about globally applicable processes and the structural elements of aquatic ecosystems worldwide but limnological emphases interests and concerns remain essentially European and North American in balance Much is known about lakes and rivers in less than one fifth of the world s land area northern temperate regions rather little is known about inland waters elsewhere **The Ecology of River Systems** Bryan R. Davies,Keith F. Walker,2013-03-09 Our understanding of the ecology of running waters has come a long way during the past few years From being a largely descriptive subject with a few under tones concerned with such things as fisheries pollution or control of blackflies it has evolved into a discipline with hypotheses such as the River Continuum Concept Vannote et al 1980 and even a book suggesting that it offers opportunity for the testing of ecological theory Barnes Minshall 1983 However perusal of the literature reveals that although some of the very early studies were concerned with large rivers references in Hynes 1970 the

great mass of the work that has been done on running water has been on streams and small rivers and information on larger rivers is either on such limited topics as fisheries or plankton scattered among the journals or not available to the general limnologist The only exceptions are a few books in this series of publications such as those on the Nile Rz6ska 1976 the Volga Morduckai Boltovskoi 1979 and the Amazon Sioli 1984 and the recent compendium by Whitton 1984 on European rivers among which there are a few that rate as large
