The Matchmakers English Edition:

Matchmakers David S. Evans, Richard Schmalensee, 2016-05-03 A different kind of matchmaker Many of the most dynamic public companies from Alibaba to Facebook to Visa and the most valuable start ups such as Airbnb and Uber are matchmakers that connect one group of customers with another group of customers Economists call matchmakers multisided platforms because they provide physical or virtual platforms for multiple groups to get together Dating sites connect people with potential matches for example and ride sharing apps do the same for drivers and riders Although matchmakers have been around for millennia they re becoming more and more popular and profitable due to dramatic advances in technology and a lot of companies that have managed to crack the code of this business model have become today s power brokers Don t let the flashy successes fool you though Starting a matchmaker is one of the toughest business challenges and almost everyone who tries to build one fails In *Matchmakers* David Evans and Richard Schmalensee two economists who were among the first to analyze multisided platforms and discover their principles and who ve consulted for some of the most successful platform businesses in the world explain how matchmakers work best in practice why they do what they do and how entrepreneurs can improve their chances for success Whether you re an entrepreneur an investor a consumer or an executive your future will involve more and more multisided platforms and *Matchmakers* rich with stories from platform winners and losers is the one book you ll need in order to navigate this appealing but confusing world

The Growth of Literature H. Munro Chadwick, Nora K. Chadwick, 2010 First published between 1932 and 1940 this is a three volume study of the historical development of literature. It explores the oral and written literatures of regions from Iceland and the British Isles to Russia, the Balkans, Africa, India and the Pacific, placing them in their historical context and examining similarities between them. The authors discuss both ancient and recent texts illustrating the connections within each group and considering the question of whether all literary growth is influenced by common factors. Praised on publication as a work that is not probably could not be superseded. *International Journal of Comparative Sociology* the book remains a benchmark for those studying comparative literature or the history of literary criticism. Volume 2 focuses particularly on Russia and the Balkans and also surveys both early Indian and early Hebrew literature.

The Growth of Literature: Volume II H. Munro Chadwick, Nora Kershaw Chadwick, 1986-11-28 *The Growth of Literature* is a key work for all scholars and students of comparative literature and will also interest those involved with other fields of literary studies as well as sociology, anthropology and related disciplines. The three volumes hailed as classics when they first appeared between 1932 and 1940 were last reprinted in 1968. Now available for the first time in paperback they remain the definitive study of their subject. The work contains an examination of comparative literatures in various countries and at various times with a view to demonstrating what literature oral and written consists of at different stages of its growth and what if any general principles can be applied to its development under diverse conditions. In the first volume Professor and Mrs Chadwick establish the categories of literature which are used throughout as a means of classification and discuss the heroic age in Europe focusing on Classical, Anglo-Saxon and Celtic cultures. In the second volume they deal with Russian oral literature, Yugoslav oral poetry, early Indian literature and early Hebrew literature. Volume III examines the oral literature of the Tatars of Polynesia and of Africa concluding with a general survey which makes use of the categories developed in the first volume.
