Melion, Bart Ramakers, 2016-03-11 Personification or prosopopeia the rhetorical figure by which something not human is given a human identity or face is readily discernible in early modern texts and images but the figure's cognitive form and function its rhetorical and pictorial effects have rarely elicited sustained scholarly attention The aim of this volume is to formulate an alternative account of personification to demonstrate the ingenuity with which this multifaceted device was utilized by late medieval and early modern authors and artists in Italy France England Scotland and the Low Countries

Personification is susceptible to an approach that balances semiotic analysis focusing on meaning effects and phenomenological analysis focusing on presence effects produced through bodily performance This dual approach foregrounds the full scope of prosopopoeic discourse not just the what but also the how not only the signified but also the signifier *Personification in Paleologan Painting, 1261-1453* Ljubica D. proposes that medieval personifications should be understood neither as failed novelistic characters nor as instruments of heavy handed didacticism She argues that personifications are instead powerful tools for thought that help us to remember and manipulate complex ideas testing them against existing moral and political paradigms Specifically different types of medieval personification should be seen as corresponding to positions in the rich and nuanced medieval debate over universals Breen identifies three different types of personification Platonic Aristotelian and Prudentian that gave medieval writers a surprisingly varied spectrum with which to paint their characters Through a series of new readings of major authors and works from Plato to Piers Plowman Breen illuminates how medieval personifications embody the full range of positions between philosophical realism and nominalism varying according to the convictions of individual authors and the purposes of individual works Recalling Gregory the Great's reference to *machinae mentis* machines of the mind Breen demonstrates that medieval writers applied personification with utility and subtlety employing methods of personification as tools that serve different functions *Machines of the Mind* offers insight for medievalists working at the crossroads of religion philosophy and literature as well as for scholars interested in literary character building and gendered relationships among characters readers and texts beyond the Middle Ages **Teutonic mythology, tr. by J.S.
