The New Atheist Denial Of History:

The New Atheist Denial of History B. Painter, 2014-11-19 This compact forcefully argued work calls Sam Harris Richard Dawkins Steven Pinker and the rest of the so called New Atheists to account for failing to take seriously the historical record to which they so freely appeal when attacking religion The popularity of such books as Harris s *The End of Faith* Dawkins s *The God Delusion* and Christopher Hitchens *God Is Not Great* set off a spate of reviews articles and books for and against yet in all the controversy little attention has focused on the historical evidence and arguments they present to buttress their case This book is the first to challenge in depth the distortions of this New Atheist history It presents the evidence that the three authors and their allies ignore It points out the lack of historical credibility in their work when judged by the conventional criteria used by mainstream historians It does not deal with the debate over theism and atheism nor does it aim to defend the historical record of Christianity or religion more generally It does aim to defend the integrity of history as a discipline in the face of its distortion by those who violate it

Getting at Jesus Peter S. Williams, 2019-01-29 Portraying themselves as challenging blind religious dogma with evidence led skepticism the neo atheist movement claims that the New Testament contains unreliable tales about a mythical figure who far from being the resurrected Lord of life may not even have lived This comprehensive critique documents the falsehood of these neo atheist claims correcting their historical and philosophical mistakes to show how we can get at the truth about the historical Jesus

Calvin and the Christian Tradition R. Ward Holder, 2022-06-09 John Calvin lived in a divided world when past certainties were crumbling Calvin claimed that his thought was completely based upon scripture but he was mistaken At several points in his thought and his ministry he set his own foundations upon tradition His efforts to make sense of his culture and its religious life mirror issues that modern Western cultures face and that have contributed to our present situation In this book R Ward Holder offers new insights into Calvin s successes and failures and suggests pathways for understanding some of the problems of contemporary Western culture such as the deep divergence about living in tradition the modern capacity to agree on the foundations of thought and even the roots of our deep political polarization He traces Calvin s own critical engagement with the tradition that had formed him and analyzes the inherent divisions in modern heritage that affect our ability to agree not only religiously or politically but also about truth An epilogue comparing biblical interpretation with Constitutional interpretation is illustrative of contemporary issues and demonstrates how historical understanding can offer solutions to tensions in modern culture

The New Atheism, Myth, and History Nathan Johnstone, 2018-06-11 This book examines the misuse of history in New Atheism and militant anti religion It looks at how episodes such as the Witch hunt the Inquisition and the Holocaust are mythologized to present religion as inescapably prone to violence and discrimination whilst the darker side of atheist history such as its involvement in Stalinism is denied At the same time another constructed history that of a perpetual and one sided conflict between religion and science rationalism is commonly used by militant atheists to suggest the innate superiority of the non religious mind In a number of detailed case studies the book traces how these myths have long been overturned by historians and argues that the New Atheism's cavalier use of history is indicative of a troubling approach to the humanities in general Nathan Johnstone engages directly with the God debate at an academic level and contributes to the emerging study of non religion as a culture and an identity

Against Atheism Oscar Priyanand, 2019-03-18 Historically atheism has always been lame and puerile but this new kid in the block called militant atheism uses science and evolution as its twin crutches to rationalize its worldview To the extent that all their books and web sites are more about science its methodology or its progress rather than about atheism itself Their strident smart talk and rational pretensions has a following whose numbers are unfortunately increasing Aided by vitriolic debates and books of Richard Dawkins Daniel Dennett and Sam Harris they are becoming more vocal by the day Against Atheism is a concise and devastating rebuttal to militant atheism This book takes a radically new approach in Christian apologetics by critically examining their arguments and exposing their scientific and rational pretensions By doing that one can clearly see the poverty of their worldview and the glaring contradictions within it

The Warfare between Science & Religion Jeff Hardin, Ronald L Numbers, Ronald A. Binzley, 2018-10-15 A very welcome volume of essays questioning the presumption of irreconcilable conflict between science and religion British Journal for the History of Science The conflict thesis the idea that an inevitable irreconcilable conflict exists between science and religion has long been part of the popular imagination The Warfare between Science and Religion assembles a group of distinguished historians who explore the origin of the thesis its reception the responses it drew from various faith traditions and its continued prominence in public discourse Several essays examine the personal circumstances and theological idiosyncrasies of important intellectuals including John William Draper and Andrew Dickson White who through their polemical writings championed the conflict thesis relentlessly Others consider what the thesis meant to different religious communities including evangelicals liberal Protestants Roman Catholics Eastern Orthodox Christians Jews and Muslims Finally essays both historical and sociological explore the place of the conflict thesis in popular culture and

intellectual discourse today Based on original research and written in an accessible style the essays in *The Warfare between Science and Religion* take an interdisciplinary approach to question the historical relationship between science and religion and bring much needed perspective to an often bitter controversy Contributors include Thomas H Aechtner Ronald A Binzley John Hedley Brooke Elaine Howard Ecklund Noah Efron John H Evans Maurice A Finocchiaro Frederick Gregory Bradley J Gundlach Monte Harrell Hampton Jeff Hardin Peter Harrison Bernard Lightman David N Livingstone David Mislin Efthymios Nicolaidis Mark A Noll Ronald L Numbers Lawrence M Principe Jon H Roberts Christopher P Scheitle M Alper Yal inkaya

Science, Religion, and the Protestant Tradition James C. Ungureanu, 2019-10-03 The story of the conflict thesis between science and religion the notion of perennial conflict or warfare between the two is part of our modern self understanding As the story goes John William Draper 1811 1882 and Andrew Dickson White 1832 1918 constructed dramatic narratives in the nineteenth century that cast religion as the relentless enemy of scientific progress And yet despite its resilience in popular culture historians today have largely debunked the conflict thesis Unravelling its origins James Ungureanu argues that Draper and White actually hoped their narratives would preserve religious belief For them science was ultimately a scapegoat for a much larger and more important argument dating back to the Protestant Reformation where one theological tradition was pitted against another a more progressive liberal and diffusive Christianity against a more traditional conservative and orthodox Christianity By the mid nineteenth century narratives of conflict between science and religion were largely deployed between contending theological schools of thought However these narratives were later appropriated by secularists freethinkers and atheists as weapons against all religion By revisiting its origins development and popularization Ungureanu ultimately reveals that the conflict thesis was just one of the many unintended consequences of the Protestant Reformation

Why We Believe Alister McGrath, 2025-01-23 Belief surely it s a relic from the past a hangover from a superstitious age that is totally out of sync with today s rational science led culture A timely often bracing and always highly stimulating book Tom Holland author of *Dominion* and co host of *The Rest is History* In today s science driven rational world belief is dismissed as an artefact of a bygone era something absurd at best harmful at worst The prevailing narratives paint belief as primitive weird even dangerous But as life grows ever more confusing and our societies more atomised contemplating something bigger than ourselves has never been more vital Alister McGrath offers a fresh perspective on belief presenting it not as a weakness of rational thought but as an essential tool for navigating uncertainty Elegant and thought provoking *Why We Believe* reveals how belief provides meaning in the face of existential despair how it fosters community and offers solace As society moves beyond the dismissive rhetoric surrounding people of faith here is a powerful manifesto for the re enchantment of the Western mind Scholarly compulsively readable and with gems of information on every page a must read Revd Fergus Butler Gallie author of *A Field Guide to the English Clergy*

Ruminating on Ruse Bradford McCall, 2025-06-19 Philosopher of biology Michael Ruse 1940 2024 was a leading voice in the science and religion

debates of our times While himself a nonbeliever he contended that an informed and intelligent person can be perfectly religious even in this age of science He argued for a middle position with regard to matters of faith and science particularly with respect to evolutionary biology Ruse sought a more peaceful or irenic resolution to tensions between biology and religion than those offered by intelligent design Moreover he became a highly productive theorist of spirituality and values prior to his untimely death In this volume leading academics enter into critical but appreciative engagement with different areas of Ruse s scholarly work This is a perfect companion volume to Reading Ruse which it is designed to fit alongside

Of Popes and Unicorns David Hutchings,James C. Ungureanu,2022 Of Popes and Unicorns shares the story of John Draper and Andrew White who in the late 19th century published books falsely claiming a toxic history between religion and science This book examines the implications of Draper and White s conspiracy and debunks the conflict thesis once and for all

S Lewis vs the New Atheists Peter S Williams,2013-02-01 The book will counter the new atheist movement using the arguments of C S Lewis thereby appealing to readers interested in both loci and showing that there is nothing especially new about the new atheism How might C S Lewis the greatest Christian apologist of the twentieth century respond to the twenty first century new atheism of Richard Dawkins Christopher Hitchens and company Might Lewis own journey from atheism to Christian belief illuminate and undercut the objections of the new atheists Christian philosopher Peter S Williams takes us on an intellectual journey through Lewis conversion in conversation with today s anti theists This book shows the breadth depth and durability of Lewis s Christian apologetics Michael Ward chaplain at St Peter s College Oxford

The New Atheists Fr. Michael Azkoul,2017-03-22 The new atheists criticize Christianity according to assumptions that are native to the Western understanding of religion Those assumptionstheological ecclesiological and even anthropological and cosmologicaloriginate in the occidental Middle Ages The new atheists and all atheists are unwilling to confess that their worldview is indebted to Western Christian thought indeed their atheism is product of this religion There would be no science without it Moreover the new atheists are ignorant of what we call Eastern Christianity Eastern Orthodoxy If they knew that truth was not the product of reason they would have encountered God the one true God not the abstract deity supreme being of Western thought Unfortunately the argument of theists delineated in public debates only strengthens the position of the new atheists In himself God is unknown and unknowable We know him because he reveals himself to those who seek him that is the Holy Trinity Of course the knowledge of God is not cognitive but gnostic spiritual knowledgesomething impossible for materialists Also the new atheists examine the nature and history of the church with false assumptions derived from the history of the West They a priori deny the existence of the supernatural and therefore the validity of the gospel spoken and written Into all this is thrown a false theology and therefore of Incarnate Lord and his place in history And of course the new atheists have no knowledge of the Eastern Church for no other reason than that they deny the supernatural holding that all forms of Christianity are fundamentally the same and that access to God and his will comes to the holy

Evolutionary History in

Theological Perspective Mario Anthony Russo, 2024-06-10 Evolutionary History in Theological Perspective Exploring the Scientific Story of the Cosmos develops a new theological interpretation of evolutionary history Exploring both secular and theological interpretations of evolutionary history this new interpretation hinges on the similarities between individual redemption and the eschatological story of cosmic redemption as mediated by the Holy Spirit throughout evolutionary history This new lens is then applied to relevant questions raised by the evolutionary process especially suffering and helps overcome the current shortcomings of contemporary interpretations of evolutionary history **After the New Atheist Debate** Phil Ryan, 2014-01-01 Drawing on the social sciences philosophy and theology Ryan examines the claims of the New Atheists and of their various religious and secular opponents and finds both sides wanting *A History of God* Karen Armstrong, 2011-08-10 Why does God exist How have the three dominant monotheistic religions Judaism Christianity and Islam shaped and altered the conception of God How have these religions influenced each other In this stunningly intelligent book Karen Armstrong one of Britain's foremost commentators on religious affairs traces the history of how men and women have perceived and experienced God from the time of Abraham to the present The epic story begins with the Jews gradual transformation of pagan idol worship in Babylon into true monotheism a concept previously unknown in the world Christianity and Islam both rose on the foundation of this revolutionary idea but these religions refashioned the One God to suit the social and political needs of their followers From classical philosophy and medieval mysticism to the Reformation Karen Armstrong performs the near miracle of distilling the intellectual history of monotheism into one superbly readable volume destined to take its place as a classic Praise for History of God An admirable and impressive work of synthesis that will give insight and satisfaction to thousands of lay readers The Washington Post Book World A brilliantly lucid spendidly readable book Karen Armstrong has a dazzling ability she can take a long and complex subject and reduce it to the fundamentals without oversimplifying The Sunday Times London Absorbing A lode of learning Time The most fascinating and learned study of the biggest wild goose chase in history the quest for God Karen Armstrong is a genius A N Wilson author of Jesus A Life **A History of Atheism in Britain** David Berman, 2013-05-02 Probably no doctrine has excited as much horror and abuse as atheism This first history of British atheism first published in 1987 tries to explain this reaction while exhibiting the development of atheism from Hobbes to Russell Although avowed atheism appeared surprisingly late 1782 in Britain there were covert atheists in the middle seventeenth century By tracing its development from so early a date Dr Berman gives an account of an important and fascinating strand of intellectual history *Reading Lucretius in the Renaissance* Ada Palmer, 2014-10-13 Ada Palmer explores how Renaissance poets and philologists not scientists rescued Lucretius and his atomism theory This heterodoxy circulated in the premodern world not on the conspicuous stage of heresy trials and public debates but in the classrooms libraries studies and bookshops where quiet scholars met transformative ideas Reading Richard Dawkins Gary Keogh, 2014 Theological reactions to the rise of the new atheist movement have largely

been critically hostile or defensively deployed apologetics to shore up the faith against attack Gary Keogh contends that focusing on scholarly material that is inherently agreeable to theology will not suffice in the context of modern academia Theology needs to test its boundaries and venture into dialogue with those with antithetical positions Engaging Richard Dawkins as the embodiment of such a position illustrates how such dialogue may offer new perspectives on classical theological problems such as the relationship of science and religion the existence of God creation natural suffering and theodicy Keogh demonstrates how a dialogical paradigm may take shape rather than merely discussing it as a theoretical framework A dialogue between such opposing hermeneutics may provide a new paradigm of theological scholarship one which is up to the task of facing its critics in the public and pluralistic context of modern academia *The History of Scepticism* Richard H. Popkin, 2003-03-20 This is a thoroughly revised and expanded edition of Richard Popkin's classic *The History of Scepticism* first published in 1960 revised in 1979 and since translated into numerous foreign languages This authoritative work of historical scholarship has been revised throughout including new material on the introduction of ancient skepticism into Renaissance Europe the role of Savonarola and his disciples in bringing Sextus Empiricus to the attention of European thinkers and new material on Henry More Blaise Pascal Thomas Hobbes Baruch Spinoza Nicolas Malebranche G W Leibniz Simon Foucher and Pierre Daniel Huet and Pierre Bayle The bibliography has also been updated
