The Fairy Tales of Oscar Wilde Dr Jarlath Killeen, 2013-04-28 Oscar Wilde's two collections of children's literature The Happy Prince and Other Stories 1888 and A House of Pomegranates 1891 have often been marginalised in critical accounts as their apparently conservative didacticism appears at odds with the characterisation of Wilde as an amoral aesthete In this the first full length study of Wilde's fairy tales for children Jarlath Killeen argues that Wilde's stories are neither uniformly conservative nor subversive but a blend of both Killeen contends that while they should be read in relation to a literary tradition of fairy tales that emerged in nineteenth century Europe Irish issues heavily influenced the work These issues were powerfully shaped by the folk Catholicism Wilde encountered in the west of Ireland By resituating the fairy tales in a complex nexus of theological political social and national concerns Killeen restores the tales to their proper place in the Wilde canon

Perceptions of Childhood in the Victorian Fin-de-Siècle Jennifer Sattaur, 2011-01-18 This book reads Victorian fin de siècle literature through the medium of perceptions of childhood It examines the connection between monstrous and idealistic symbolic representations of childhood represented by key cultural discourses of the Victorian fin de siècle Specifically anxieties about change are linked closely to anxieties about childhood procreation and maturation in a range of Children's and Adults texts from the 1860s to the 1890s The book demonstrates the ways in which the emergent social movements which have come to define and represent change in the fin de siècle period were inherently concerned with the ideas of childhood and parenthood and the ways in which they represented both the promise and the threat of the future The texts are arranged by theme and grouped according to whether they are seen primarily as intended for children or for adults In texts intended for adult readers images of childhood are more covert and more metaphorical than those texts aimed at child readers in which overt pedagogical concerns are often brought to bear Nothing embodies the idea of the future more than the children who stand as a bridge between now and then This book analyses the connections between Victorian perceptions of childhood and the anxieties and upheavals of the Victorian Fin de Siècle
