bold new textbook represents a significant step forward in social policy teaching by combining comparative and global perspectives. Introducing readers to a wide spread of international challenges and issues, the book shows how insights into policy can be generated using a comparative and multidisciplinary approach. Global in its canvas and analytical in its method, the book explores the economic, social and political contexts of social policy, examines in detail its institutions and fields of practice, illustrates the field's main ideas, themes and practices, drawing on a rich international literature and using pertinent and thought provoking examples. Authored by two highly respected and experienced academics, this book demonstrates the rewards of studying social policy from an international perspective by avoiding the constraints of a single nation focus. Clear, authoritative and wide ranging, it will be essential reading for students of social sciences taking courses covering social policy, social welfare and comparative policy analysis.

Politics of Segmentation Georg Picot, 2013-06-17 When political parties make policy decisions, they are influenced by the competition they face from other parties. This book examines how party competition and party systems affect reforms of social protection. Featuring a historical comparison of Italy and Germany post 1945, the book shows how a high number of parties and ideological polarisation lead to fragmented and unequal social benefits. Utilising a comparative approach, the author brings together two important issues in welfare state research that have been insufficiently investigated: Firstly, the complex influence of party competition on social policy making, and second, how some social groups enjoy better social protection than others. Moving beyond the two countries of the case study, the book proposes an innovative framework for studying segmentation of social protection and applies this framework to a wider set of 15 advanced welfare states. Overall, this book draws together different strands of research on political parties and on welfare states and introduces a new argument on how party politics shapes social policy. An invaluable text on the political economy of the welfare state, *Politics of Segmentation* will be of interest to scholars of political economy, social policy and comparative politics.

Most importantly, this book identifies and continues the discussion regarding the critical role of family centered policies as expressed in the United Nations Convention on the Rights of Persons with Disabilities, UNCRPD, as well as the future of family policy toward families of children with disabilities at a time of economic crisis.
