Tappan Zee Bridge Traffic Report:

The Tappan Zee Bridge Robert T. Hintersteiner, Robert T. Hintersteiner P.E., 2007-02 The objective of this book is to suggest solutions to our 21st Century regional transportation problems The author's proposals address a variety of regional transportation concepts in case study format regarding the current dilemma of how to implement improvements to the Tappan Zee Bridge The Tappan Zee Bridge is a major transportation link to the New York City Metropolitan Regional Area as well as to the New England Regional Area This dilemma epitomizes transportation issues faced by other large regional metropolitan areas throughout the world To successfully resolve the questions posed requires a systematic and coordinated approach for managing 21st Century traffic The need for a comprehensive transportation plan was brought into focus by the destruction of the World Trade Center in New York City on September 11 2001 which demonstrated the need for alternative transportation systems within the New York City Metropolitan Regional Area *New York Court of Appeals. Staten Island Bridges Program, Modernization and Capacity Enhancement Project, 1997 **Politics Across the Hudson** Philip Mark Plotch, 2018-06-20 Winner of the 2015 American Planning Association New York Metro Chapter Journalism Award The State of New York built one of the world's longest widest and most expensive bridges the new Tappan Zee Bridge stretching more than three miles across the Hudson River approximately thirteen miles north of New York City In *Politics Across the Hudson* urban planner Philip Plotch offers a behind the scenes look at three decades of contentious planning and politics centered around this bridge recently renamed for Governor Mario M Cuomo the state's governor from 1983 to 1994 He reveals valuable lessons for those trying to tackle complex public policies while also confirming our worst fears about government dysfunction Drawing on his extensive experience planning megaprojects interviews with more than a hundred key figures including governors agency heads engineers civic advocates and business leaders and extraordinary access to internal government records Plotch tells a compelling story of high stakes battles between powerful players in the public private and civic sectors He reveals how state officials abandoned viable options squandered hundreds of millions of

dollars forfeited more than three billion dollars in federal funds and missed out on important opportunities Faced with the public s unrealistic expectations no one could identify a practical solution to a vexing problem a dilemma that led three governors to study various alternatives rather than disappoint key constituencies This revised and updated edition includes a new epilogue and more photographs and continues where Robert Caro s The Power Broker left off and illuminates the power struggles involved in building New York s first major new bridge since the Robert Moses era Plotch describes how one governor Andrew Cuomo shrewdly overcame the seemingly insurmountable obstacles of onerous environmental regulations vehement community opposition insufficient funding interagency battles and overly optimistic expectations
