the Fuel Consumption of Medium and Heavy Duty Vehicles That report provided a series of findings and recommendations on the development of regulations for reducing fuel consumption of MHDVs On September 15 2011 NHTSA and EPA finalized joint Phase I rules to establish a comprehensive Heavy Duty National Program to reduce greenhouse gas emissions and fuel consumption for on road medium and heavy duty vehicles As NHTSA and EPA began working on a second round of standards the National Academies issued another report Reducing the Fuel Consumption and Greenhouse Gas Emissions of Medium and Heavy Duty Vehicles Phase Two First Report providing recommendations for the Phase II standards This third and final report focuses on a possible third phase of regulations to be promulgated by these agencies in the next decade

Chemicals without Harm Ken Geiser, 2015-06-19 A proposal for a new chemicals strategy that we work to develop safer alternatives to hazardous chemicals rather than focusing exclusively on controlling them Today there are thousands of synthetic chemicals used to make our clothing cosmetics household products electronic devices even our children's toys Many of these chemicals help us live longer and more comfortable lives but some of these highly useful chemicals are also persistent toxic and dangerous to our health and the environment For fifty years the conventional approach to hazardous chemicals has focused on regulation barriers and protection In Chemicals without Harm Ken Geiser proposes a different strategy based on developing and adopting safer alternatives to hazardous chemicals rather than focusing exclusively on controlling them Geiser reviews past government policies focused on controlling chemicals describes government initiatives outside the United States that have begun to implement a more sustainable chemical policy and offers an overview of the chemicals industry and market He develops a safer chemicals policy framework that includes processes for characterizing classifying and prioritizing chemicals generating and using new chemical information and promoting transitions to safer chemicals The shift in strategy described by Geiser will require broad changes in science the chemicals economy and government policy Geiser shows that it is already beginning identifying an emerging movement of scientists corporate managers environmental activists and government leaders who are fashioning a new twenty first century approach to chemicals

Tools for High Performance Computing 2015 Andreas Knüpfer, Tobias Hilbrich, Christoph Niethammer, José Gracia, Wolfgang E. Nagel, Michael M. Resch, 2016-07-27 High Performance Computing HPC remains a driver that offers huge potentials and benefits for science and society However a profound understanding of the computational matters and specialized software is needed to arrive at effective and efficient simulations Dedicated software tools are important parts of the HPC software landscape and support application developers Even though a tool is by definition not a part of an application but rather a supplemental piece of software it can make a fundamental difference during the development of an application Such tools aid application developers in the context of debugging performance analysis and code optimization and therefore make a major contribution to the development of robust and efficient parallel software This book introduces a selection of the tools presented and discussed at the 9th International Parallel Tools Workshop held in Dresden Germany

September 23 2015 which offered an established forum for discussing the latest advances in parallel tools *The Closing of the Liberal Mind* Kim R. Holmes, 2017-12-12 A former U S Assistant Secretary of State and currently Acting Senior Vice President for Research at The Heritage Foundation Kim R Holmes surveys the state of liberalism in America today and finds that it is becoming its opposite illiberalism abandoning the precepts of open mindedness and respect for individual rights liberties and the rule of law upon which the country was founded and becoming instead an intolerant rigidly dogmatic ideology that abhors dissent and stifles free speech Tracing the new illiberalism historically to the radical Enlightenment a movement that rejected the classic liberal ideas of the moderate Enlightenment that were prominent in the American Founding Holmes argues that today's liberalism has forsaken its American roots incorporating instead the authoritarian anti clerical and anti capitalist prejudices of the radical and largely European Left The result is a closing of the American liberal mind Where once freedom of speech and expression were sacrosanct today liberalism employs speech codes trigger warnings boycotts and shaming rituals to stifle freedom of thought expression and action It is no longer appropriate to call it liberalism at all but illiberalism a set of ideas in politics government and popular culture that increasingly reflects authoritarian and even anti democratic values and which is devising new strategies of exclusiveness to eliminate certain ideas and people from the political process Although illiberalism has always been a temptation for American liberals lurking in the radical fringes of the Left it is today the dominant ideology of progressive liberal circles This makes it a new danger not only to the once venerable tradition of liberalism but to the American nation itself which needs a viable liberal tradition that pursues social and economic equality while respecting individual liberties Studies in the History of Tax Law, Volume 7 Peter Harris, Dominic de Cogan, 2015-09-24 These are the papers from the 2014 Cambridge Tax Law History Conference revised and reviewed for publication The papers fall within six basic themes Two papers focus on colonialism and empire dealing with early taxation in colonial New Zealand and New South Wales Two papers deal with fiscal federalism one on Australia in the first half of the twentieth century and the other with goods and services taxation in China Another two papers are international in character one considers development of the first Australia United States tax treaty and the other development of the first League of Nations model tax treaties Four papers focus on UK income tax one on source another on retention at source a third on the use of finance bills and the fourth on establishment of the Board of Referees Three papers deal with tax and status one with the tax profession another with the medical profession and a third with aristocrats The final three papers deal with tax theorists one with David Hume another focused on capital transfer tax scholarship and a final paper on the tax state in the global era **Emergency Dermatology** Ronni Wolf, Lawrence Charles Parish, Jennifer L. Parish, 2017-02-24 There are many emergencies that the dermatologist needs to address and many cutaneous diseases in the emergency room that require rapid dermatologic consultation The dermatologist is frequently the first physician to examine such patients before a hospital admission and also the first to identify a critical situation stabilize the patient and choose

urgent and appropriate intervention Both the practicing dermatologist and the emergency physician will benefit from the revised and updated edition of this text from top international dermatologists enabling them to hone their diagnostic skills expand their knowledge and understanding of pathologic events and learn treatment options available for acute life threatening skin diseases in this complicated and multifaceted field
