Widiger, 2017-03-27 The Five Factor Model which measures individual differences on extraversion agreeableness conscientiousness emotional stability and openness to experience is arguably the most prominent dimensional model of general personality structure In fact there is now a considerable body of research supporting its construct validity and practical application in clinical health and organizational settings Taking this research to the forefront The Oxford Handbook of the Five Factor Model showcases the work of expert researchers in the field as they each offer important insight and perspective on all that is known about the Five Factor Model to date By establishing the origins foundation and predominance of the Five Factor Model this Handbook will focus on such areas as construct validity diagnosis and assessment personality neuroscience and how the Five Factor Model operates in business and industry animal personality childhood temperament and clinical utility The Pastor's Wedding Manual Jim Henry, 1984-12-07 A collection of creative wedding ceremonies and helps to guide the pastor in making the wedding service a worshipful experience **The Revised NEO Personality Inventory** Ralph L. Piedmont, 2013-11-11 The assessment of individual differences has a long history As early as 2200 B C the Chinese were employing methods to select candidates for civil service positions Over the ensuing centuries philosophers theologians and the nobility all noticed and debated the role of character in shaping the destiny and quality of individual lives This interest spawned widely different methods of evaluating the timbre of temperament bumps on the head lines on the hand shape of the body all of which were employed in attempts to gain insight into basic human motives The emergence of the scientific method and its application to this endeavor reinvigorated society's efforts in this direction and an abundant variety of assessment instruments consequently became available The outbreak of World War I created a need for the efficient assessment of individual differences in large groups Such instruments as the Woodworth Personal Data Sheet and the Army Alpha Test resulted in genuine breakthroughs in assessment technology These tests provided standardized sets of items that permitted quantitative comparisons among people Over the years numerous scales have been developed which have been based on widely differing levels of psychometric sophistication **Technical Paper - Army Research Institute for the Behavioral and Social Sciences** ,1978 **Eugenic Nation** Alexandra Minna

Stern,2016 With an emphasis on the American West *Eugenic Nation* explores the long and unsettled history of eugenics in the United States This expanded second edition includes shocking details that demonstrate that the story is far from over Alexandra Minna Stern explores the unauthorized sterilization of female inmates in California state prisons and ongoing reparations for North Carolina victims of sterilization as well as the topics of race based intelligence tests school segregation the U S Border Patrol tropical medicine the environmental movement and opposition to better breeding Radically new and relevant this edition draws from recently uncovered historical records to demonstrate patterns of racial bias in California s sterilization program and to recover personal experiences of reproductive injustice Stern connects the eugenic past to the genomic present with attention to the ethical and social implications of emerging genetic technologies Provided by publisher

Behavioral Assessment and Rehabilitation of the Traumatically Brain-Damaged Barry A. Edelstein, Eugene T.

Couture,2013-11-22 This book developed out of the editors longstanding interest in the retraining of traumatically brain damaged adults and the management of their behavior by family members A search for relevant experimental evidence to support the clinical use of behavioral principles for retrain ing which began in 1977 turned up little empirical support Moreover the literature on retraining was dispersed among a variety of journals published in various countries Nowhere was there a compendium of literature that addressed issues of assessment and retraining There was no place to turn if one wanted to move from a standard neuropsychological evaluation to the retraining of skill deficits revealed in the evaluation We have attempted to edit a book that represents what we had hoped to find in the literature and could be used by professionals in clinical psychology clinical neuropsychology rehabilitation medicine physical therapy speech therapy and other disciplines that address rehabilitation of brain damaged adults a book that addresses assessment and rehabilitation issues and is sufficiently detailed to offer the reader a starting point in developing behavioral assessment and rehabilitation programs The book contains conceptual foundations reviews of research descriptions of successful rehabilitation programs and relatively detailed approaches to the retraining of specific skills A shift from an assessment based practice to one encompassing both prescriptive assessment and treatment has become a recognized transition in the neuropsychological literature and was best articulated in an article by Gerald Goldstein in March of 1979 *Stuttering* Barry Guitar,2006 This new Third Edition provides a comprehensive overview of the etiology and development of stuttering and details appropriate approaches to accurate assessment and treatment A new chapter on related fluency disorders discusses evaluation and treatment of stuttering associated with neurological disease or trauma psychological disturbance or mental retardation and explains how developmental stuttering can be differentiated from these conditions This edition also features a new chapter on preliminaries to assessment as well as new information on differential diagnosis of stuttering versus other fluency disorders Appendices include forms for diagnosis and evaluation **The Treatment of Stuttering in the Young School**

Aged Child Roberta Lees,2005-03-11 This practical text brings together well known writers from the UK USA and Australia

It sets out to discuss the assessment and treatment of the young school aged child who stutters aged approx 7 to 12 years A number of differing treatment approaches for this client group are presented in the one volume The contributors as well as describing their treatment approaches have considered the theoretical models on which their approaches are based and ways of measuring outcomes an important topic in an age of evidence based practice In order to gain a more comprehensive view of the school aged child one chapter considers epidemiology of stuttering whilst two chapters address the issue of concomitant problems such as other language problems and ADHD This text is written for students and clinicians working with children who stutter It will also be of interest to researchers
