Circling Back Joe C. Truett, 1996-04 There was so much space These words epitomize ecologist Joe Truett's boyhood memories of the Angelina River valley in East Texas Years and miles later back home for the funeral of his grandfather Truett began a long meditation on the world Corbett Graham had known and he himself had glimpsed a now vanished world where wild hogs and countless other animals rustled through the leaves cows ate pinewoods grass instead of corn oaks and hickories and longleaf pines were untouched by the corporate ax and the river flowed freely Truett's meditation resulted in this clear sighted portrait of a place over time its layers revealed by his love and care and curiosity Truett celebrates his family's heritage and the unspoiled natural world of the Piney Woods without nostalgia He recreates an older simpler more worthy age but he knows that we have lost touch with it because we wanted to he laments the loss but understands it What makes his prose so moving and so redeeming is this precise combination of honesty and sorrow overlaid by a quiet passion for both the natural and the human worlds

Lauck, Gleaves Whitney, Joseph Hogan, 2018-11 In comparison to such regions as the South the far West and New England the Midwest and its culture have been neglected both by scholars and by the popular press Historians as well as literary and art critics tend not to examine the Midwest in depth in their academic work And in the popular imagination the Midwest has never really ascended to the level of the proud literary South the cultured democratic Northeast or the hip innovative West Coast *Finding a New Midwestern History* revives and identifies anew the Midwest as a

field of study by promoting a diversity of viewpoints and lending legitimacy to a more in depth rigorous scholarly assessment of a large region of the United States that has largely been overlooked by scholars The essays discuss facets of midwestern life worth examining more deeply including history religion geography art race culture and politics and are written by well known scholars in the field such as Michael Allen Jon Butler and Nicole Etcheson

Archaeological Method and Theory Linda Ellis, 2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials Thus the reader will find entries on subject matter covering disciplinary theory legislation affecting the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct

their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology

Archaeology Imma Ollich-Castanyer,2012-05-09 The contents of this book show the implementation of new methodologies applied to archaeological sites Chapters have been grouped in four sections New Approaches About Archaeological Theory and Methodology The Use of Geophysics on Archaeological Fieldwork New Applied Techniques Improving Material Culture and Experimentation and Sharing Knowledge Some Proposals Concerning Heritage and Education Many different research projects many different scientists and authors from different countries many different historical times and periods but only one objective working together to increase our knowledge of ancient populations through archaeological work The proposal of this book is to diffuse new methods and techniques developed by scientists to be used in archaeological works That is the reason why we have thought that a publication on line is the best way of using new technology for sharing knowledge everywhere Discovering sharing knowledge asking questions about our remote past and origins are in the basis of humanity and also are in the basis of archaeology as a science

The First Americans James Adovasio, Jake Page, 2009-01-16 J M Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates Who were the first humans in the Americas and how and when did they get there At its heart The First Americans is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about and the firestorm it has ignited As he writes The work of lifetimes has been put at risk reputations have been damaged an astounding amount of silliness and even profound stupidity has been taken as serious thought and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science

Guns, Germs, and Steel Jared Diamond, 2017-03-07 Winner of the Pulitzer Prize New York Times Bestseller Over Two Million Copies Sold One of the most significant projects embarked upon by any intellectual of our generation Gregg Easterbrook New York Times Guns Germs and Steel presents a groundbreaking unified narrative of human history Why did Eurasians conquer displace or decimate Native Americans Australians and Africans instead of the reverse In this artful informative and delightful William H McNeill New York Review of Books book a classic of our time evolutionary biologist Jared Diamond dismantles racist theories of human history by revealing the environmental factors actually responsible for its broadest patterns The story begins 13 000 years ago when Stone Age hunter gatherers constituted the entire human population Around that time the developmental paths of human societies on different continents began to diverge greatly Early domestication of wild plants and animals in the Fertile Crescent China Mesoamerica the Andes and other areas gave peoples of those regions a head start at a new way of life But the localized origins of farming and herding proved to be only part of the explanation for their differing fates The unequal rates at which food production spread from those initial centers were influenced by other features of climate and geography including the disparate sizes locations and even shapes of the continents Only societies that moved away from the hunter gatherer stage went on to develop writing technology government and organized religions as well as deadly germs and potent weapons of war It was those societies adventuring on sea and land that invaded others decimating native inhabitants
