exteriors of the pyramids the history and builders of the pyramids theories of construction theories of their purpose and function the sacred geometry that was incorporated into the design of the pyramids Books Written in Stone: Volume 1 J. Marc. Merrill, 2012-03-06 The Great Pyramid mysteries abound For example Why was the subterranean chamber apparently abandoned and yet it is larger than the Queen's Chamber and the King's Chamber combined Why is there a pit in the floor of the subterranean chamber and why does the narrow passage that snakes south off the subterranean chamber come to a sudden end after 53 feet Why was sand from the Sinai hidden behind the wall of the horizontal passage to the Queen's Chamber and why is there a sudden drop in that passage Why was the Grand Gallery built so large in comparison to the ascending passage and why are the slots in the ramps of the Grand Gallery empty Why was the antechamber to the King's Chamber built with both limestone and granite blocks and what purpose could the so called Granite Leaf have served Egyptologists pyramidologists and others outside these two camps have attempted to explain such anomalies Their theories are examined and compared to a new vision that answers not just some of the questions about the Great Pyramid but all of them as revealed in Books Written in Stone Enoch the Seer the Pyramids of Giza and the Last Days The Atlantis Blueprint Colin Wilson, Rand Flem-Ath, 2008-12-10 A spellbinding blend of history and science scholarship and speculation this landmark work presents startling new evidence that traces archaeology's most enduring mysteries back to the lost civilization of Atlantis The Great Pyramid Stonehenge Machu Picchu For centuries these and other sacred sites have inspired wonder among those who ponder their origins Conventional science tells us they were constructed by local peoples working with the primitive tools of a fledgling civilization But these megaliths nonetheless continue to attract pilgrims scholars and adventurers drawn by the possibility that their true spiritual and technological secrets remain hidden Who could have built these elaborate monuments How did they do it And what were their incomprehensible efforts and sacrifices designed to accomplish Now comes a revolutionary theory that connects these mysteries to reveal a hidden global pattern the ancient work of an advanced civilization whose warnings of planetary cataclysm now reverberate across one hundred millennia International bestselling author Colin Wilson and Canadian researcher Rand Flem-Ath join forces to share startling evidence of a fiercely intelligent society dating back as much as 100 000 years one that sailed the oceans of the world building monuments to preserve and communicate its remarkable wisdom The Atlantis Blueprint is their term for a sophisticated network of connections between these sacred sites that they trace to Atlantis a sophisticated maritime society that charted the globe from its home base in Antarctica until it was obliterated by the devastating global changes it anticipated but could not escape Here is adventure to realms beyond our imaginings to shifting poles changing latitudes into the world of ancient mariners who recharted the globe to astonishing discoveries about our ancestors Here are the great mysteries the incredibly complex geography of the Temple of Luxor the startling sophistication of Egyptian science and math and tantalizing similarities among the Hebrew Greek and Mayan alphabets to the Chinese lunar zodiac The Atlantis Blueprint opens up a

Pandora's box of ancient mysteries, lost worlds and millennial riddles. It is a story as controversial, fascinating, dangerous and inspiring as any ever told. *Egyptomania* Ronald H. Fritze, 2021-02-04 *Egyptomania* takes us on a historical journey to unearth the Egypt of the imagination, a land of strange gods, mysterious magic, secret knowledge, monumental pyramids, enigmatic sphinxes and immense wealth. Egypt has always exerted a powerful attraction on the Western mind, and an array of figures have been drawn to the idea of Egypt. Even the practical-minded Napoleon dreamed of Egyptian glory and helped open the antique land to explorers. Ronald H. Fritze goes beyond art and architecture to reveal *Egyptomania's* impact on religion, philosophy, historical study, literature, travel, science and popular culture. All those who remain captivated by the ongoing phenomenon of *Egyptomania* will revel in the mysteries uncovered in this book. *The Creators* Daniel J. Boorstin, 2012-04-11 By piecing the lives of selected individuals into a grand mosaic, Pulitzer Prize-winning historian Daniel J. Boorstin explores the development of artistic innovation over 3,000 years. A hugely ambitious chronicle of the arts that Boorstin delivers with the scope that made his *Discoverers* a national bestseller. Even as he tells the stories of such individual creators as Homer, Joyce, Giotto, Picasso, Handel, Wagner and Virginia Woolf, Boorstin assembles them into a grand mosaic of aesthetic and intellectual invention. In the process, he tells us not only how great art and great architecture and philosophy is created, but where it comes from and how it has shaped and mirrored societies from Vedic India to the twentieth-century United States. **John Greaves, Pyramidographia and Other Writings, with Birch's Life of John Greaves** John Anthony Butler, 2019-01-22 This is a modern spelling edition of John Greaves's *Pyramidographia* 1646, together with some miscellaneous travel writings, letters and a biography of Greaves by Thomas Birch. It includes a full scholarly introduction and detailed notes. This book is the first of its kind in English and undertakes a scientific evaluation of the pyramids through metrics using state-of-the-art instruments and drawing on both ancient and modern authorities, amongst which is included Arab and Persian writers as well as Western sources. Greaves's work is distinguished from others by his refusal to be drawn into mystical or theological speculation and is an excellent example of how seventeenth-century scientists may be said to have pioneered modern methods of scientific inquiry. Greaves discusses the age of the pyramids, their purpose, the nature of their builders and the methods he believes were used to erect them. It may be said that he is probably the earliest genuine English Egyptologist and that *Pyramidographia* is indeed the earliest scientific treatise on the subject. Greaves's travel writings, which also contain a great deal of measurement, show readers how he approached his sojourn in foreign lands, and his letters give some measure of the man and his relationships with fellow scientists and patrons. The biography by Thomas Birch further fills out Greaves's life and career.
