Conceiving Histories Isabel Davis, 2025-09-02 A fascinating and beautifully illustrated account of trying to conceive in both the past and the present Inspired by the author's own experiences Conceiving Histories brings together history personal memoir and illustration to investigate the culturally hidden experience of trying to conceive In elegant engaging prose Isabel Davis explores the combination of myth fantasy science and pseudo science that the un reproductive body encounters in pursuit of a viable pregnancy The book chronicles the trying to conceive lifecycle arc from sex education at school through the desire to be a parent into the specifics of trying and struggling to conceive It also looks back at conception throughout history to open a new vista on what we live with today A central argument of Davis's is that historical people lived with the unknown just like we do but were more explicitly able to acknowledge it In an age of assistive reproductive technologies the act of embracing uncertainty seems difficult Although the topic of not conceiving is potentially painful this is not a grim book more than grief it is motivated by curiosity wonder compassion and even humor With 108 full color illustrations Conceiving Histories is also a beautiful material object an intentionally playful antidote and supplement to online search engines the resort of so many embroiled in fertility challenges

Infertility Robin E. Jensen, 2016-09-29 This book explores the arguments appeals and narratives that have defined the meaning of infertility in the modern history of the United States and Europe Throughout the last century the inability of women to conceive children has been explained by discrepant views that women are individually culpable for their own reproductive health problems or that they require the intervention of medical experts to correct abnormalities Using doctor patient correspondence oral histories and contemporaneous popular and scientific news coverage Robin Jensen parses the often thin rhetorical divide between moralization and medicalization revealing how dominating

explanations for infertility have emerged from seemingly competing narratives Her longitudinal account illustrates the ways in which old arguments and appeals do not disappear in the light of new information but instead reemerge at subsequent often seemingly disconnected moments to combine and contend with new assertions Tracing the transformation of language surrounding infertility from barrenness to in fertility this rhetorical analysis both explicates how language was and is used to establish the concept of infertility and shows the implications these rhetorical constructions continue to have for individuals and the societies in which they live

Reproductive Justice and the Catholic Church Emily Reimer-Barry, 2024-06-10 Pregnancy loss is profoundly complex ambiguous and alienating but telling women who have procured abortions that they are murderers and sinners is not the best way forward Magisterial teachings on abortion are too often presented as moral absolutes when in fact moral absolutism distorts the rich wisdom of the Catholic intellectual tradition This book initiates a new conversation about women s experiences of miscarriage stillbirth and abortion arguing that we need not approach these difficult life experiences in a simplistic way Dr Reimer Barry argues that both the pro life and pro choice movements make important and valuable claims yet each approach on its own is flawed Drawing on the framework of reproductive justice together with Catholic social teaching Dr Reimer Barry suggests a new way forward for abortion discourse that takes seriously the full human dignity of women and the intrinsic though not absolute value of prenatal life She argues that instead of thinking of the Church as a moral teacher with leaders in Rome or Washington DC dictating to the consciences of the faithful a better way to address the complexity of difficult pregnancy discernments would be to think of the Church as a community of support in the midst of and after difficult discernments a community that seeks justice together and implements structural reforms while also providing spiritual care to those in need What women deserve is justice

doctor's strict protocols and confused when they directly conflicted with information on the bestseller list. After experiencing mixed results and a life of deprivation that seemed unsustainable at best, she adopted 12 of her own wellness directives including eliminating sugar, switching to all natural beauty products, and getting in touch with her spiritual side to find out which lifestyle changes truly impacted her health for the better. *The Wellness Project* is the insightful and hilarious result of that year of exploration, part memoir and part health and wellness primer, complete with 20 healthy recipes. It's a must-read not just for those suffering from autoimmune disease but for anyone looking for simple ways to improve their health without sacrificing life's pleasures.

You're Doing it Wrong! Bethany L. Johnson, Margaret M. Quinlan, 2019-04-19 New mothers face a barrage of confounding decisions during the life cycle of early motherhood, which includes: Should they change their diet or mindset to conceive? Exercise while pregnant? Should they opt for a home birth or head for a hospital? Whatever they choose, they will be sure to find plenty of medical expertise from health practitioners, social media influencers, and others telling them that they're making a series of mistakes. As intersectional feminists with two small children each, Bethany L. Johnson and Margaret M. Quinlan draw from their own experiences as well as stories from a range of caretakers throughout history. *You're Doing it Wrong!* investigates the storied history of mothering advice in the media, from the newspapers, magazines, doctors' records, and personal papers of the nineteenth century to today's websites, Facebook groups, and Instagram feeds. Johnson and Quinlan find surprising parallels between today's mothering experts and their Victorian counterparts, but they also explore how social media has placed unprecedented pressures on new mothers, even while it may function as social support for some. They further examine the contentious construction of prenatal and baby care expertise itself, as individuals such as everyone from medical professionals to experienced moms have competed to have their expertise

acknowledged in the public sphere Exploring potential health crises from infertility treatments to better babies milestones You re Doing it Wrong provides a provocative look at historical and contemporary medical expertise during conception pregnancy childbirth postpartum and infant care stages **Life Begins at 60** Frieda Birnbaum,2016-05-31 Dr Frieda Birnbaum made headlines eight years ago when she gave birth to twin boys at the age of sixty And despite being a psychotherapist who had counseled other mothers for decades Birnbaum secretly wondered What have I gotten myself into Can I keep up It turned out she could and then some Like so many people who take on new things at age sixty and older Birnbaum discovered a new lease on life She felt more energized than ever on most days anyway to run after twins Josh and Jaret She parlayed the fame into TV and radio appearances commenting on subjects from Bill Cosby to Hillary Clinton Her psychotherapy practice flourished And as she reinvigorated her career her relationships with her family including her husband of more than forty years grew even stronger To be incredible mothers and partners Birnbaum believes women must be fulfilled and challenged as people first The secret she discovered was to welcome growing older rather than fear it This captivating and inspiring memoir is complemented with practical advice for a positive outlook and staying active while aging As Birnbaum reveals it s possible even easy to look and feel fabulous and glamorous in our sixties and well beyond

Foundations of Biomedical

Knowledge Representation Arjen Hommersom, Peter J.F. Lucas, 2016-01-07 Medicine and health care are currently faced with a significant rise in their complexity This is partly due to the progress made during the past three decades in the fundamental biological understanding of the causes of health and disease at the molecular sub cellular and organ level Since the end of the 1970s when knowledge representation and reasoning in the biomedical field became a separate area of research huge progress has been made in the development of methods and tools that are finally able to impact on the way medicine is being practiced Even though there are huge differences in the techniques and methods used by biomedical researchers there is now an increasing tendency to share research results in terms of formal knowledge representation methods such as ontologies statistical models network models and mathematical models As there is an urgent need for health care professionals to make better decisions computer based support using this knowledge is now becoming increasingly

important It may also be the only way to integrate research results from the different parts of the spectrum of biomedical and clinical research The aim of this book is to shed light on developments in knowledge representation at different levels of biomedical application ranging from human biology to clinical guidelines and using different techniques from probability theory and differential equations to logic The book starts with two introductory chapters followed by 18 contributions organized in the following topical sections diagnosis of disease monitoring of health and disease and conformance assessment of health and personalization prediction and prognosis of health and disease treatment of disease and recommendations
