The Geography Of Nowhere

Steven Bouma-Prediger, Brain J. Walsh

The Geography Of Nowhere:

Geography Of Nowhere James Howard Kunstler, 1994-07-26 Argues that much of what surrounds Americans is depressing ugly and unhealthy and traces America's evolution from a land of village commons to a man made landscape that ignores nature and human needs

The Geography of Nowhere James Howard Kunstler, 1993 **The Geography of Nowhere** James Howard Kunstler, 1993 Kunstler traces America's evolution from a land of village commons to a nation of main streets to a world reshaped by the automobile and explains how developers deliberately replace community with consumerism creating a man made landscape that ignores the needs of humans and nature

Suburban Nation Andres Duany, Elizabeth Plater-Zyberk, Jeff Speck, 2000 Duany and Elizabeth Plater Zyberk are at the forefront of the New Urbanism movement and in *Suburban Nation* they assess sprawl's costs to society be they ecological economic aesthetic or social 115 illustrations

Home from Nowhere James Howard Kunstler, 1998-03-26 In his landmark book *The Geography of Nowhere* James Howard Kunstler visited the tragic sprawl landscape of cartoon architecture junked cities and ravaged countryside America had become and declared that the deteriorating environment was not merely a symptom of a troubled culture but one of the primary causes of our discontent In *Home from Nowhere* Kunstler not only shows that the original American Dream the desire for peaceful pleasant places in which to work and live still has a strong hold on our imaginations but also offers innovative eminently practical ways to make that dream a reality Citing examples from around the country he calls for the restoration of traditional architecture the introduction of enduring design principles in urban planning and the development of public spaces that acknowledge our need to interact comfortably with one another

Metroburbia, USA Paul L. Knox, 2008 Decades of economic prosperity in the United States have redefined the American dream Paul Knox explores how extreme versions of this dream have changed the American landscape Increased wealth has led America's metropolitan areas to develop into vast sprawling regions of metroburbia fragmented mixtures of employment and residential settings combining urban and suburban characteristics Upper middle class Americans are moving into larger homes in greater numbers which leads Knox to explore the relationship between built form and material culture in contemporary society He covers changes in home design real estate the work of developers and the changing wishes of consumers Knox shows that contemporary suburban landscapes are a product of consumer demand combined with the logic of real estate development mediated by design and policy professionals and institutions of governance Suburban landscapes not only echo the fortunes of successive generations of inhabitants Knox argues they also reflect the country's changing core values Knox addresses key areas of concern and importance to today's urban planners and suburban residents including McMansions traffic disasters house design homeowner's associations exclusionary politics and big box stores Through the inclusion of examples and photos *Metroburbia USA* creates an accessible portrait of today's suburbs supported by data anecdotes and social theory It is a broad interpretation of the American metropolitan form that looks carefully at the different influences that contribute to

where and how we live today *Rooted in Rock* Jim Gould,2001-06-01 In the past twenty years the Adirondacks have inspired a resident population of writers who have gained regional and national prominence using the Adirondack region as their primary setting and subject matter or at least as a significant point of departure *Rooted in Rock* is the first collection of its kind in more than twenty years since Paul Jamieson's *Adirondack Reader* What makes the volume unique though is the number of contributors who not only make the Adirondacks their subject but who make their homes in these mountains The works in this volume include contemporary essays literary nonfiction poetry short fiction and excerpted fiction and are a mix of new and previously published writings by forty three authors established as well as emerging including Bill McKibben Sue Halpern Russell Banks Alex Schoumatoff Chase Twichell Curt Stager Amy Godine and Jim Gould to name a few *The KunstlerCast* Duncan Crary,2021-09-17 Based off the popular podcast this book collects one man's conversations with an outspoken social critic on the negative effects of the suburbs James Howard Kunstler has been described as one of the most outrageous commentators on the American built environment An outspoken critic of suburban sprawl Kunstler is often controversial and always provocative The KunstlerCast is based on the popular weekly podcast of the same name which features Kunstler in dialogue with author Duncan Crary offering a personal window into Kunstler's worldview Presented as a long form conversational interview The KunstlerCast revisits and updates all the major ideas contained in Kunstler's body of work including The need to rethink current sources of transportation and energy The failure of urban planning architecture and industrial society America's plastic dysfunctional culture The reality of peak oil Whether sitting in the studio strolling city streets visiting a suburban mall or even Happy Motoring the grim predictions Kunstler makes about America's prospects are leavened by his signature sharp wit and humor This book is rounded out by commentary footnotes and supplemental vignettes told from the perspective of an embedded reporter on the Kunstler beat Readers may or may not agree with the more dystopian of Kunstler's visions Regardless The KunstlerCast is bound to inspire a great deal of thought laughter and hopefully action Praise for The KunstlerCast A bracing dose of reality for an unreal world Stephen J Dubner co author of *Freakonomics* and *SuperFreakonomics* Erudite eloquent with good humor about the hilariously grotesque North American nightmare of car addicted suburban sprawl Dmitry Orlov author of *Reinventing Collapse* Prepare to be enlightened infuriated and amused Gregory Greene Director *The End of Suburbia* So enlightening yet casual that the reader feels like they're eavesdropping into the den of Kunstler's prodigious mind Andrew D Blechman author of *Leisureville* **The Built Environment** Wendy R. McClure,Tom J. Bartuska,2011-09-09 This book takes a sweeping view of the ways we build things beginning at the scale of products and interiors to that of regions and global systems In doing so it answers questions on how we effect and are affected by our environment and explores how components of what we make from products buildings and cities are interrelated and why designers and planners must consider these connections *Healthy Cities* Namir Khan,Willem H. Vanderburg,2001 Modern cities can be designed to constitute a more supportive environment for a great

many activities provide a more livable habitat and reduce the burden imposed on the biosphere They can be made healthier in terms of the definition by World Health Organization and more sustainable by means of new and emerging preventive approaches Healthy Cities focuses on those preventive approaches that can make cities healthier and more sustainable This book as well as the two companion volumes Sustainable Energy and Sustainable Production is the result of a twelve year research project carried out at the Center for Technology and Social Development at the University of Toronto The research findings led to the development of a new conceptual framework and strategy aimed at converting technological and economic growth into development that would gradually become more sustainable *Beyond Homelessness* Steven

Bouma-Prediger, Brain J. Walsh, 2008-06-03 This book is a brilliant use of metaphor that makes clear why the world leaves us feeling so uneasy

By the Rivers of Babylon Robert P. Hoch, 2013-12-01 The language of exile focused with theological and biblical narratives and coupled with depictions of real life exilic communities can equip church leaders as agents in the creation of new communities Robert Hoch reads the larger North American tradition of Christian worship and mission through the prism of visibly marinalized communities Through this lens leaders may come to see diversity as an indication of mission vitality and focus less on assimilating people and more on the future promises of God and the manifold textures of incarnation The City Creative Michael H. Carriere, David Schalliol, 2021-04-18 In the wake of the Great Recession

American cities from Philadelphia to San Diego saw an upsurge in hyperlocal placemaking small scale interventions aimed at encouraging greater equity and community engagement in growth and renewal But the projects that were the most successful at achieving these lofty ambitions weren't usually established by politicians urban planners or real estate developers they were initiated by community activists artists and neighbors In order to figure out why The City Creative mounts a comprehensive study of placemaking in urban America tracing its intellectual history and contrasting it with the efforts of people making positive change in their communities today Spanning the 1950s to the post recession 2010s The City Creative highlights the roles of such prominent individuals and organizations as Jane Jacobs Christopher Alexander Richard Sennett Project for Public Spaces and the National Endowment for the Arts in the development of urban placemaking both in the abstract and on the ground But that's only half the story Bringing the narrative to the present Michael H Carriere and David Schalliol also detail placemaking interventions at more than 200 sites in more than 40 cities combining archival research interviews participant observation and Schalliol's powerful documentary photography Carriere and Schalliol find that while these formal and informal placemaking interventions can bridge local community development and regional economic plans more often than not they push the boundaries of mainstream placemaking Rather than simply stressing sociability or market driven economic development these initiatives offer an alternative model of community led progress with the potential to redistribute valuable resources while producing tangible and intangible benefits for their communities The City Creative provides a kaleidoscopic overview of how these initiatives grow and sometimes collapse illustrating the

centrality of placemaking in the evolution of the American city and how it can be reoriented to meet demands for a more equitable future **Beyond Homelessness, 15th Anniversary Edition** Steven Bouma-Prediger, Brian J. Walsh, 2023-09-12

What would the world look like if everyone had a home The rise in homeless encampments The destruction of our planet The disconnection from place caused by capitalism and technology Beyond the unavailability of housing our culture is experiencing a devastating loss of home In *Beyond Homelessness* Steven Bouma Prediger and Brian Walsh explore the relationship between socioeconomic ecological and cultural homelessness Bouma Prediger and Walsh blend groundbreaking scholarship with stirring biblical meditations while enriching their discussion with literature music and art Offering practical solutions and a hope filled vision of home they show how to heal the deep dislocations in our society In this fifteenth anniversary edition the authors return to their work with a new postscript in which they discuss the evolution of their ideas and share true stories of home and community built anew This revitalized classic is a must read for any Christian committed to social justice and anyone longing for home *The Myth of Emptiness and the New American Literature of Place* Wendy Harding, 2014-10-01

From the moment the first English speaking explorers and settlers arrived on the North American continent many have described its various locations and environments as empty Indeed much of American national history and culture is bound up with the idea that parts of the landscape are empty and thus open for colonization settlement economic improvement claim staking taming civilizing cultivating and the exploitation of resources In turn most Euro American nonfiction written about the landscape has treated it either as an object to be acted upon by the author or an empty space unspoiled by human contamination to which the solitary individual goes to be refreshed and rejuvenated In *The Myth of Emptiness and the New American Literature of Place* Wendy Harding identifies an important recent development in the literature of place that corrects the misperceptions resulting from these tropes Works by Rick Bass Charles Bowden Ellen Meloy Jonathan Raban Rebecca Solnit and Robert Sullivan move away from the tradition of nature writing with its emphasis on the solitary individual communing with nature in uninhabited places to recognize the interactions of human and other than human presences in the land In different ways all six writers reveal a more historically complex relationship between Americans and their environments In this new literature of place writers revisit abandoned threatened or damaged sites that were once represented as devoid of human presence and dig deeper to reveal that they are in fact full of the signs of human activity These writers are interested in the role of social political and cultural relationships and the traces they leave on the landscape Throughout her exploration Harding adopts a transdisciplinary perspective that draws on the theories of geographers historians sociologists and philosophers to understand the reasons for the enduring perception of emptiness in the American landscape and how this new literature of place works with and against these ideas She reminds us that by understanding and integrating human impacts into accounts of the landscape we are better equipped to fully reckon with the natural and cultural crisis that engulfs all landscapes today **Infinite Suburbia** MIT Norman B. Leventhal Center for

Advanced Urbanism,2018-03-13 Infinite Suburbia is the culmination of the MIT Norman B Leventhal Center for Advanced Urbanism's yearlong study of the future of suburban development Extensive research an exhibition and a conference at MIT's Media Lab this groundbreaking collection presents fifty two essays by seventy four authors from twenty different fields including but not limited to design architecture landscape planning history demographics social justice familial trends policy energy mobility health environment economics and applied and future technologies This exhaustive compilation is richly illustrated with a wealth of photography aerial drone shots drawings plans diagrams charts maps and archival materials making it the definitive statement on suburbia at the beginning of the twenty first century **The Past and Future City**

Stephanie Meeks,Kevin C. Murphy,2016-10-04 At its most basic historic preservation is about keeping old places alive in active use and relevant to the needs of communities today As cities across America experience a remarkable renaissance and more and more young diverse families choose to live work and play in historic neighborhoods the promise and potential of using our older and historic buildings to revitalize our cities is stronger than ever This urban resurgence is a national phenomenon boosting cities from Cleveland to Buffalo and Portland to Pittsburgh Experts offer a range of theories on what is driving the return to the city from the impact of the recent housing crisis to a desire to be socially engaged live near work and reduce automobile use But there's also more to it Time and again when asked why they moved to the city people talk about the desire to live somewhere distinctive to be some place rather than no place Often these distinguishing urban landmarks are exciting neighborhoods Miami boasts its Art Deco district New Orleans the French Quarter Sometimes as in the case of Baltimore's historic rowhouses the most distinguishing feature is the urban fabric itself While many aspects of this urban resurgence are a cause for celebration the changes have also brought to the forefront issues of access affordable housing inequality sustainability and how we should commemorate difficult history This book speaks directly to all of these issues In *The Past and Future City* Stephanie Meeks the president of the National Trust for Historic Preservation describes in detail and with unique empirical research the many ways that saving and restoring historic fabric can help a city create thriving neighborhoods good jobs and a vibrant economy She explains the critical importance of preservation for all our communities the ways the historic preservation field has evolved to embrace the challenges of the twenty first century and the innovative work being done in the preservation space now This book is for anyone who cares about cities places and saving America's diverse stories in a way that will bring us together and help us better understand our past present and future *The City in Mind* James Howard Kunstler,2003-01-07 This title takes an in depth look at the history development and state of architectural and societal success of cities including London Rome Berlin Paris and Mexico City **Culture,**

Urbanism and Planning Manuel Guardia,2016-05-13 The relationship between culture and urbanism has been the focus of much discussion and debate in recent years While globalisation tends towards a homogeneity successful global cities have a strong individual and particularly cultural identity The economic value of the culture of cities lies not only in the arts taking

place there but also in the city's fabric its architecture and in its cultural heritage This volume brings together a team of leading specialists to examine the policies of image and city marketing which have developed over the past 15 years and whether these are a continuity of earlier strategies Featuring case studies which illustrate diverse perspectives on linking culture urbanism and history the book reviews heritage and planning culture looking at the experience of urbanism in the Old Historic City The book also assesses the increasingly important issue of urban images and their influence on planning strategies

The Circumference of Home Kurt Hoelting, 2010-04-13 This much is clear to me If I can't change my own life in response to the greatest challenge now facing our human family who can And if I won't make the effort to try why should anyone else So I've decided to start at home and begin with myself The question is no longer whether I must respond The question is whether I can turn my response into an adventure After realizing the gaping hole between his convictions about climate change and his own carbon footprint Kurt Hoelting embarked on a yearlong experiment to rediscover the heart of his own home He traded his car and jet travel for a kayak a bicycle and his own two feet traveling a radius of 100 kilometers from his home in Puget Sound This circumference of home proved more than enough Part quest and part guidebook for change Hoelting's journey is an inspiring reminder that what we need really is close at hand and that the possibility for adventure lies around every bend
