Russia Naval & Military Press, 2003-02 This American Department of the Army publication is important to any study of the German campaign in Russia because it is one of the German Report Series which was issued after the Second World War written by the German officers who had the most knowledge of the campaign. The publication looks above all at the planning for Operation Barbarossa in detail. The first discussions of July 1940 when Hitler ordered the German General Staff to prepare plans for the operation was followed by the genesis of a number of ideas for its execution. The Operations Order of February 1941 was followed by a number of changes. This led to the movement of the necessary troops to the east and the strategic concentration of air and land elements prior to the attack. All of this is described in detail in the book. Operations are then shown in detail with supporting maps and the treatment is chronological. The halt before Moscow and the indecision of 1942 is shown to have been the basis for the subsequent failure of the whole war against Russia. The effects of the Russian winter counter attack in 1942, the German summer offensive, the stagnation in the autumn of 1942 and the lead up to the Stalingrad debacle are all described in detail. The book is illustrated with a number of charts and 17 situation and planning maps. This publication is fundamental to a study of Operation Barbarossa partly because it sets the scene so well and also because the failings of 1941 and 1942 are shown to be building into a cumulative disaster from which the German Army was unable to recover.

The German Campaign in Russia George E. Blau, 1955. The purpose of this study is to describe German planning and operations in the first part of the campaign against Russia. The narrative starts with Hitler's initial plans for an invasion of Russia and ends at the time of Germany's maximum territorial gains during the battle for Stalingrad.

Tank Warfare on the Eastern Front, 1941-1942 Robert Forczyk, 2014-02-24. The author of *Case White: The Invasion of Poland* delves into the strategy and weaponry of armored warfare during the early years of the Russo German War. The German panzer armies that swept into the Soviet Union in 1941 were an undefeated force that had honed their skill in combined arms warfare to a fine edge. The Germans focused their panzers and tactical air support at points on the battlefield defined as *Schwerpunkt*—main effort to smash through any defensive line and then advance to envelope their adversaries. Initially these methods worked well in the early days of Operation Barbarossa and the tank forces of the Red Army suffered defeat after defeat. Although badly mauled in the opening battles, the Red Army's tank forces did not succumb to the German armored onslaught and German planning and logistical deficiencies led to over extension and failure in 1941. In the second year of the invasion, the Germans directed their *Schwerpunkt* toward the Volga and the Caucasus and again achieved some degree of success, but the Red Army had grown much stronger and by November 1942 the Soviets were able to turn the tables at Stalingrad. Robert Forczyk's incisive study offers fresh insight into how the two most powerful mechanized armies of the Second World War developed their tactics and weaponry during the critical early years of the Russo German War. He uses

German Russian and English sources to provide the first comprehensive overview and analysis of armored warfare from the German and Soviet perspectives His analysis of the greatest tank war in history is compelling reading Includes photos
