Sharon R. Steadman

The Great House:

Inside the Great House Daniel Blake Smith, 1986 *Inside the Great House* explores the nature of family life and kinship in planter households of the Chesapeake during the eighteenth century a pivotal era in the history of the American family Drawing on a wide assortment of personal documents among them wills inventories diaries family letters memoirs and autobiographies as well as on the insights of such disciplines as psychology demography and anthropology Daniel Blake Smith examines family values and behavior in a plantation society Focusing on the emotional texture of the household he probes deeply into personal values and relationships within the family and the surrounding circle of kin Childrearing practices male female relationships attitudes toward courtship and marriage father son ties the character and influence of kinship familial responses to illness and death and the importance of inheritance all receive extended treatment A striking pattern of change emerges from this mosaic of life in the colonial South What had once been a patriarchal authoritarian and emotionally restrained family environment altered profoundly during the latter half of the eighteenth century The personal documents cited by Smith clearly point to the development after 1750 of a more intimate child centered family life characterized by close emotional bonds and by growing autonomy especially for sons in matters of marriage and career choice Well to do planter families inculcated in their children a strong measure of selfconfidence and independence as well as an abiding affection for their family society Smith shows that Americans in the North as well as in the South were developing an altered view of the family and the world beyond it a perspective which emphasized a warm and autonomous existence This fascinating study will convince its readers that the history of the American family is intimately connected with the dramatic changes in the lives of these planter families of the eighteenth century Chesapeake *The Great House*

Great House Communities across the

Chacoan Landscape John Kantner, Nancy M. Mahoney, 2000-03-01 Beginning in the tenth century Chaco Canyon emerged as an important center whose influence shaped subsequent cultural developments throughout the Four Corners area of the American Southwest Archaeologists investigating the prehistory of Chaco Canyon have long been impressed by its massive architecture evidence of widespread trading activities and ancient roadways that extended across the region Research on Chaco Canyon today is focused on what the remains indicate about the social political and ideological organization of the Chacoan people Communities with great houses located some distance away are of particular interest because determining how and why peripheral areas became associated with the central canyon provides insight into the evolution of the Chacoan tradition This volume brings together twelve chapters by archaeologists who suggest that the relationship between Chaco Canyon and outlying communities was not only complex but highly variable Their new research reveals that the most distant groups may have simply appropriated Chacoan symbolism for influencing local social and political relationships whereas many of the nearest communities appear to have interacted closely with the central canyon perhaps even living there on a seasonal basis The multifaceted approach taken by these authors provides different and refreshing perspectives on Chaco Their contributions offer new insight into what a Chacoan community is and shed light on the nature of interactions among prehistoric communities
