Handbook on Agent-Oriented Design Processes Massimo Cossentino, Vincent Hilaire, Ambra Molesini, Valeria Seidita, 2014-03-28 To deal with the flexible architectures and evolving functionalities of complex modern systems the agent metaphor and agent based computing are often the most appropriate software design approach As a result a broad range of special purpose design processes has been developed in the last several years to tackle the challenges of these specific application domains In this context in early 2012 the IEEE FIPA Design Process Documentation Template SC0097B was defined which facilitates the representation of design processes and method fragments through the use of standardized templates thus supporting the creation of easily sharable repositories and facilitating the composition of new design processes Following this standardization approach this book gathers the documentations of some of the best known agent oriented design processes After an introductory section describing the goal of the book and the existing IEEE FIPA standard for design process documentation thirteen processes including the widely known Open UP the de facto standard in object oriented software engineering are documented by their original creators or other well known scientists working in the field As a result this is the first work to adopt a standard unified descriptive approach for documenting different processes making it much easier to study the individual processes to rigorously compare them and to apply them in industrial projects While there are a few books on the market describing the individual agent oriented design processes none of them presents all the processes let alone in the same format With this handbook for the first time researchers as well as professional software

developers looking for an overview as well as for detailed and standardized descriptions of design processes will find a comprehensive presentation of the most important agent oriented design processes which will be an invaluable resource when developing solutions in various application areas

The Pataphysician's Library Ben Fisher, 2000-01-01 The Pataphysician's Library is a study of aspects of 1890s French literature with specific reference to the traditions of Symbolism and Decadence Its main focus is Alfred Jarry who has proved perhaps surprisingly to be one of the more durable fin de siècle authors The originality of this study lies in its use of the enigmatic list of books termed the livres pairs which appears in Jarry's 1898 novel *Gestes et Opinions du docteur Faustroll pataphysicien* his best known prose work The greatest interest of the livres pairs lies in a group of works by Jarry's friends and contemporaries primarily Leon Bloy Georges Darien Gustave Kahn Catulle Mendès Josephin Rodière and Henri de Regnier Several of these authors feature as the lords of islands visited by the pataphysician Dr Faustroll in his curious voyage around Paris In conjunction with Jarry's own works the contemporary livres pairs serve to illustrate the vibrant and experimental atmosphere in which these authors worked Aspen and the American Dream Jenny Stuber, 2021-03-23 How is it possible for a town to exist where the median household income is about 73 000 but the median home price is about 4 000 000 Boring into the impossible math of Aspen Colorado Stuber explores how middle class people have found a way to live in this supergentrified town Interviewing a range of residents policymakers and officials Stuber shows that what resolves the math equation between incomes and home values in Aspen Colorado the X factor that makes middle class life possible is the careful orchestration of diverse class interests within local politics and the community She explores how this is achieved through a highly regulatory and extractive land use code that provides symbolic and material value to highly affluent investors and part year residents as well as less affluent locals many of whom benefit from an array of subsidies including an extensive affordable housing program that redistribute economic resources in ways that make it possible for middle class residents to live there Stuber further examines how Latinos who provide much of the service work in Aspen and who tend to live outside the town fit into the social geography of one of the most unequal places in the country Overall Stuber argues that the Aspen's ability to balance the interests of its diverse class constituencies is not a foregone conclusion rather it is the

result of efforts by local stakeholders citizens government developers and vacationers to preserve the town s unique feel and value and keep Aspen Aspen in all its complex dynamics Green Development Rocky Mountain Institute,1998 Green Development is good for business Tenants owners purchasers and brokers are all becoming more sophisticated and are realizing the financial and social benefits of green product Gerald Hines Chairman of Hines Environmentally responsible real estate development makes dollars and sense Green Development describes an exciting new field in which environmental considerations are viewed as opportunities to create fundamentally better buildings and communities more comfortable more efficient more appealing and ultimately more profitable If you re a developer architect planner contractor lender or city official this book speaks your language Every stage of the development process is examined in detail market research site planning design approvals financing construction marketing and occupancy Also included are lists of project statistics and contacts books and other information sources and development strategies Based on 80 case studies drawn from Rocky Mountain Institute s extensive worldwide research and consulting work Green Development distills proven procedures and practical lessons that work in the real world **The Code of Federal Regulations of the United States of America** ,1995 The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government Code of Federal Regulations ,1994
