Translation Dinda L. Gorlée, 2022-10-04 Here is a radically interdisciplinary account of how Charles S Peirce's theory of signs can be made to interact meaningfully with translation theory In the separate chapters of this book on semiotranslation the author shows that the various phenomena we commonly refer to as translation are different forms of genuine and degenerate semiosis Also drawing on insights from Ludwig Wittgenstein and Walter Benjamin and drawing analogies between their work and Peirce's it is argued that through the kaleidoscopic evolutionary process of unlimited translation signs deploy their meaning potentialities This enables the author to throw novel light upon Roman Jakobson's three kinds of translation intralingual interlingual and intersemiotic translation Gorlée's pioneering study will entice translation specialists semioticians and language philosophers into expanding their views upon translation and hopefully into cooperative research projects
