Jane's All the World's Aircraft ,2009 **Automotive Engineering** ,1983 **Books for Junior College Libraries**
American Library Association,1969 **Microbes and Microbial Biotechnology for Green Remediation** Junaid Ahmad
Malik,2022-06-14 Microbes and Microbial Biotechnology for Green Remediation provides a comprehensive account of
sustainable microbial treatment technologies The research presented highlights the significantly important microbial species
involved in remediation the mechanisms of remediation by various microbes and suggestions for future improvement of
bioremediation technology The introduction of contaminants due to rapid urbanization and anthropogenic activities into the
environment causes unsteadiness and distress to the physicochemical systems including living organisms Hence there is an
immediate global demand for the diminution of such contaminants and xenobiotics which can otherwise adversely affect the
living organisms Over time microbial remediation processes have been accelerated to produce better eco friendlier and more
biodegradable products for complete dissemination of these xenobiotic compounds The advancements in microbiology and
biotechnology lead to the launch of microbial biotechnology as a separate area of research and contributed dramatically to
the development of the areas such as agriculture environment biopharmaceutics and fermented foods Microbes stand as an
imperative efficient green and economical alternative to conventional treatment technologies The proposed book provides
cost effective and sustainable alternatives This book serves as a reference for graduate and postgraduate students in
environmental biotechnology and microbiology as well as researchers and scientists working in the laboratories and
industries involved in research related to microbiology environmental biotechnology and allied research Discusses important
microbial activities such as biofertilizer biocontrol biosorption biochar biofilm biodegradation bioremediation bioclogging and
